HUMANE TRAIT COST GERMANS THE WAR, SAYS ADMIRAL SIMS

Victory Declared to Be Within Grasp If They Had Been Willing to Pay Price

NEW YORK, April 16-Rear Admiral William S. Sims, retired, commander of the American naval forces operating in European waters during the World War, expressed the opinion on Saturday that if the United States had been in Germany's fix, this country would have used submarines to sink merchant ships without warning, just as Germany did.

"If the situation had been reversed," declared the Admiral, in an interview with a New York Tribune represen-tative, "if we had been in Germany's place and if we had believed that losing the war would have meant the domination of our country by Germany be sure to make that point—we, too, ould have sunk ships without warn-

Then Ambassador Harvey was right when he stated our motive for going into the war?" the Tribune correspondent asked.

"We went into the war because we were scared to stay out," said the Admiral. Elaborating this statement, he declared:

Regarding the Lusitania

Germany could have won the war hands down if she had been willing to pay the price. If they had destroyed all

hands down if she had been willing to pay the price. If they had destroyed all the people in the boats, slaughtered the seamen of those merchant ships, fellows we could not have replaced, they would have won. Not only would the Allies have lost the trained seamen who were killed, but many others would have refused to go to sea. As it was, there were men who survived after being torpedoed half a dozen times.

But the price—if the German Government had given orders to slaughter all the people in merchant ships that they torpedoed and if the orders had been carried out, everybody in the world, doubtless, would have declared an open meason against all Germans wherever found. But they could have won that way. If the situation had been reversed, if we had been in the situation of the Germans, well, of course, the Allies never set out to conquer the world as the Germans did, but if we had been in such a situation, and believed that losing the war would mean that our country was to be dominated by Germany, I believe that we, too, would have sunk ships without warning.

"Even the Lusitania admiral?" To

"Even the Lusitania, admiral?" To this he replied:

this he replied:

Well, now, if the United States could have pictured itself in the present airuation of Germany, disarmed and a part of its territory occupied by allen troops, we pretty nearly would have done as they did, even to the Lusitania; always remembering, of course, that i do not believe the German expected buch a loss of life.

The disaster that occurred to the Lusitania was a great blow to the Germans. It was wholly unexpected by them, I think, for this reason: If you had asked any naval officer or naval constructor what would have happened when this vessel was torpedoed I am

when this vessel was torpedoed I am sure that the great majority would have said that after being struck she would have floated for hours before sinking, and that, being close to land, the would have been beached.

This wet institution whose slogan is the would have been beached.

This wet institution whose slogan is the present of the present of the present of the present when the present would have been beached.

This wet institution whose slogan is the present of the present of

had any idea that the torpedoing of that vessel would have caused such a loss, so many hundreds of people; even that it would have caused the loss of any lives at all.

United States Motive

The Admiral was asked if he had er sought in his book or elsewhere o define the United States' motive in entering the war. His answer was:

No. But if we had not gone into the war England would have had to ask for an armistice, and undoubtedly one of the things the Germans would have been the delivery of the British fleet, and this would have given Germany a naval force of such tremendous power that they could have flominated the world.

People will say that the British never The results obtained in the last electric war and the world.

People will say that the British never would have surrendered their fleet; that they would have rather seen it go down fighting, but they would have been given no opportunity to send it to the bottom that way. Germany would have said, "Send us your fleet or go on starving." They would not have offered hem a chance to fight. Remember that. They would have said, "As the price of an armistice, we want your fleet delivered at the place we specify."

Now, Britain was approaching defeat, through starvation. They never have more than enough food in their islands to keep them going more than a few weeks or, at the most, months. I believe we went into the war because we

lieve we went into the war because we were scared to stay out.

It is a matter of historical record that we did not go into the war at all seriously for a good while after we had declared war. The thing was so badly conducted in Washington that, as an example, it was months after we had adopted the convoy system before I was notified that Washington did not washington did not approve.

CHINESE AGAINST JAPANESE GAINING CONTROL OF OPIUM

Offer of Funds to Establish Traffic Bureau Unwelcome-Powerful Ring Mooted

By Special Cable

PEKING, April 16—A Japanese group has submitted a memorandum to the Ministry of Finance proposing the establishment by the Chinese Govand offering a large loan on the se-curity of opium revenues. The memot over \$300,000,000 annually.

system and severe punishment for illicit users and traffickers, control to be in the hands of foreigners, strict supervision and high taxation on the growing of opium in China, and more stringent measures to prevent snug-

The sum of \$10,000,000 is offered as an immediate advance on a loan, the total amount of which is not stated.

First Legalization Plan The memorandum argues that legal-zation will bring the Government \$400,000,000 yearly, make possible the abolishment of the evil and promote the health of the people by careful

medical supervision.

The first formal public proposal for the legalization of the opium traffic and the establishment of a Government monopoly was made by Sir Francis Aglen, Inspector-General of Chi nese customs, in January. A good authority says the proposal was unofficially made by Baron Hayashi to Dr. V. K. Wellington Koo at London before the Washington conference but Dr. Koo refused to transmit the proposal. An attempt was made by the Japanese to have the opium question discussed at the Washington conference, but the Chinese flatly refused.

Sir Francis made the proposal publicly in a speech before the Interna-tional Anti-Opium Association sugof opium under the militarists' orders and the huge amounts of opium and morphia smuggled into the country in spite of the strenuous efforts of the customs authorities, and emphasized the need for control and eventual suppression, through a monopoly, with the financial gain only incidental.

Proposal Condemned

The Anti-Opium Association issued a formal statement strongly condemning the proposal as a grave retrograde step, and saying if the Government had power to make the monopoly effective it would have power to enforce the present prohibition.

The President, Li Yuan-hung, de-

DAUGHTERS OF REVOLUTION OPEN 32ND ANNUAL SESSION

Washington Is Host to D. A. R. Congress-Featured by Three-Cornered Race for President-General

Special from Monitor Bureau WASHINGTON, April 16-The Daughters of the American Revolution have

gathered from the east, west, north and south for their thirty-second annual convention. For several years the fighting quality has lain dormant and only the badges of many bars have given evidence of military for-bears, but this year there is not only to be an election of a president gen-eral, but a three-cornered fight is on. There is therefore an air of bustling activity appropriate to a contest that is certain to involve rivalry and may include surprises.

The headquarters of Mrs. G. Wallace W. Hanger and Mrs. Anthony Wayne Cook were established in the Willard Hotel several days ago and Mrs. William Cumming Story came upon the scene a little later. Mrs. George Maynard Miner, the president-general, and Mrs. George Thacher Guernsey, her predecessor, have also opened head-quarters. Meanwhile delegates and alternates, supporters and onlookers have been arriving by every train and the stage is set and the actors ready for the opening of the congress today in the Memorial Continental Hall, which has been outgrown, by the way, and this year is supplemented by a new building on the land owned by the Daughters directly back of the npeli Reconstruction......18 main building, which is one of the im-

Private Purchase Unlikely

ment will not allow a few lines, or

Mr. Lasker declared that he was

the "cream of the fleet," as Mr. Lasker

WASHINGTON, April 16-Unless

New Scheme to Be Evolved, Mr. Lasker Predicts Government Operation for Fleet—Private Purchase Unlikely

By Special Cable private interests are willing to buy the bulk of foreign trade routes being operated by the Shipping Board, with continue to operate the fleet, though under a more aggressive policy, which includes asking Congress for an appropriation of about \$100,000,000 for the construction of special types of vessels to "balance" the merchant to peace with Germany.

That the Harding Administration purposes to "keep America on the seas" if it requires further dipping into the Treasury to maintain the routes against foreign competition, was the statement of Albert D. Lasker, chairman of the board, in elaborating on the brief announcement made at the White House following the comproceedings is one of hope. In the first place, the conference decided, not publicly but as it were in the lobbies, to establish a commission to draw up the White House, following the con-ference Saturday between President Harding and members of the board. The first step taken by the board which will report probably early in will be an appeal of public capital to bid on the shipping lines; the Govern-May when M. Poincaré will go to

Brussels to discuss the matter with the Belgians.

The Loncheur Conversations

The moment wasn't quite ripe to the trade routes will be made within

make its prices as low as possible, considering the obstacles a private operator would have to encounter in maintaining service, but Mr. Lasker made it plain that it is not President

Harding's policy to dump the ships on the market regardless of price. Failure of private capital to come forward will see the Shipping Board cancel the so-called Mo-4 contract under which private companies operate vessels for federal account and the board will have its own agents run these lines. It was said that with the Government standing all the losses of operation under the Mo-4 contract there was little incentive to the operating company to boost the business.

Idle Tonnage to Be Sold The board will consolidate trade outes and do away with overlapping of service. There are 39 managing agents, running 81 separate services. Mr. Lasker said it is planned to consolidate the lines, so that only from 16 to 25 operating companies required to run the active fleet of 388 ships. That the consolidation program would not decrease the service now offered, but result in heavier cargoes and lower expenses for the reduced fleet was the view given by Mr. Lasker.

It is not contemplated to operate directly the passenger lines. The board believes this to be a highly specialized business and the lines now operating them have built up specialzed organizations for the purpose. With reference to the idle tonnage

held by the board, it was said there ships would be sold at "market prices" although enough of them would be retained by the Government to show the world that the American Government has ample ships to furnish the national arbitration. It has submitted needed service.

"The main thing to be considered," said Mr. Lasker, "is to keep the adverse decisions.

American flag on the sea." He added: It is getting re-We believe from the temper of Congress and the country, as evidenced by the fact (that Congress appropriated \$50,000,000 for next year without five minutes' debate in either House, that they want a Government operated they want a Government operated the proposition of the congress of t

PRESIDENT BRAVES DIN OF PARTY SPLIT

Air of Conflict Increases Mr. Harding's Determination to

Fight to Finish By FREDERIC WILLIAM WILE WASHINGTON, April 16-President Harding has thrown down the gauntlet to Republican leaders on the World with it at all costs, even at the risk of bitter opposition within his party's ranks. Republican spokesmen who foreshadow a serious rift in the G. O. P., if the World Court program is maintained have learned that such an argument makes no appeal to Mr. Harding. He is convinced the country can be won for the World Court; in-sists it is consistent Republican doc-

trine, and will espouse it to the bitter end, regardless of consequences. These statements can be made on unimpeachable authority. The President is in fighting mood. He is described as having arrived at the Grover Cleveland temper under some-thing of the provocation that impelled that Democratic President to stiffen his backbone on a critical occasion. The air of conflict Mr. Harding sniffs has whetted, rather than diminished, his determination to advocate American entry into the international

He is not frightened in the slightest degree by the admonitions of Repub-lican senators like James E. Watson from Indiana that the blood-relationship between the court and the League of Nations dooms his plan. The ancient saw about the British Empire's power to outvote the United States in the League Assembly is dismissed at the White House as an utterly irrele-vant scarecrow. The President has thoroughly persuaded himself that, with proper reservations, the United States can join the court without the remotest danger of contaminating entanglements.

Ready for Hard Fight

He is equally confident the Nation can be easily and clearly educated on the understanding that uninterrupted service will be maintained for a that point. At any rate, Mr. Harding is prepared to buckle on his armor period of years, the Government will and carry the issue to the country, making the fighting as rough as may be necessary. It will be for the oppo-sition to determine just how heroic measures the President will have to adopt. His present plan is to go the full limit if the enemy forces him to

do so.

Republican chieftains hoped to induce the President to drop or sidetrack the World Court by appealing to his well-known sense of party loyalty. They thought that if they dinned "party split" into the Harding ears long eough and loud enough his devotion to G. O. P. harmony would overcome his enthusiasm for the Court. If they have not already discovered it they have not already discovered it, they presently will gather that they are "barking up the wrong tree." Split or no split, the President is going to

swing "clean through." His answer to the argument that it is "bad politics" to force the Court issue is that it would be difficult to lobbies, to take every advantage of any opening for conversations with England.

lobbies, to take every advantage of any opening for conversations with England.

land.

land.

land.

put it, to be taken over, but private find a better one. With "prosperity" at home and the Court gesture in the sake its alternative of direct Govern- direction of "international co ment operation. A public offering of tion," Mr. Harding feels that the G. O. P. will have two winning issues, instead of one. He prefers that Republican minds should willingly go along with this theory. He will adhere to it, whether they do or not. Those who have seen it at close range say

the Harding faw is set on that score. Irreconcilable Republicans are trying to wreck the World Court proposal by assailing it as a "Hughes scheme" or a "Hoover scheme." The idea back of those tactics is to make out that the President had the thing 'put over" on him, more or less against his will and better judgment. case. It was President Harding who submitted the proposal to Secretary Hughes, and not the other way about Mr. Hughes gave it his immediate and

cordial support. Approved Hoover Speech

Secretary Herbert Hoover's speech at Des Moines last week, firing the Administration's opening gun for the World Court, was read and approved by President Harding before delivery. ecretary Hughes' elaboration of the plan before the International Law Soclety on April 27 is certain also to concrete White. House approval It is likely to cover different ground than Mr. Hoover traversed in Iowa. He will be talking to international lawyers, so in large part the forthcoming Hughes exposition will be legalistic. But it may be expected to deal in hammer-and-tongs fashion with the cardinal objections which opponents have raised. The Secretary of State, for instance, brands as grotesque the notion that America might some day find itself haled into the World Court to adjudicate, at foreign behest, such things as its tariff and immigration laws.

If Mr. Hughes ventilates views his friends all know him to hold, his public advocacy of the World Court will be found to adhere to a few simple, basic fundamentals. United States throughout its career has given practical effect to its tradozens of disputes to arbitral decision, and abided uncomplainingly by

It is getting ready to pay Norway \$11,000,000 on a shipping arbitration tional honor. It is unlikely to do so

We believe that Congress, when it in the future. When nations disagree, they have three ways open to them: they can do nothing; they can fight, or they can arbitrate. The Harding Administration is in no doubt as to which path the American people prefer to travel. Nor is it in any doubt that the people are ready to enter an arbitration tribunal into which admission may now be had on America's own terms. The World Court is held by President World Court is held by President Harding and his advisers to be the best tribunal that could be constituted, and probably represents the Nation's final attempt to establish the reign of law on a firm foundation. It is very definitely up to the United States "to take it or leave it," and, if it "leaves" it, to be fairly certain no other arbitral machinery ever will be set up to take its place.

AMERICA TO KEEP ITS SHIPS ON SEAS

meets again, will vote the money for the new construction. So it will be decided, when the response is received from the private operators as to their from the private operators as to their willingness to buy with guaranteed maintenance of service whether these ships will be operated by private owners or by Government operation. Notwithstanding the fact that the President and the board hate Government operation, we will get for the first time the maximum of operation by the beard.

board.

I have determined to use this opportunity to assure the American public that the flag shall remain on the seas and that the United States is in the shipping business to stay.

ENGLAND-BOSTON MAIL IS SUCCESS

city boxholders in the post office got the time which would have been taken if New York had been made the port of call, while an almost equal advantage was given mail delivered here, to find the price of the price of the commodity is largely affected by the prices established on this market. The tariff, the commission finds, does not operate as an important factor in the rise in the price of sugar. tage was given mail delivered here, bound for New York, Philadelphia, Chicago and other points. The Car-mania's arrival inaugurated the new

city mail included in the 190 brought for the first time direct to Boston for transfer throughout the United States, was begun in record time after the Carmania's docking at Pier 3, East Boston. The vessel left Liverpool. April 7, at 2 o'clock and touched her Boston pier at 9 a. m. yesterday.

The mail receipt from the post office was timed 11 a. m. and the office routine of receipting and checking was quickened so that Boston letters were being sorted shortly after. Officials point out that mail aboard another British ship which started about the same time from England but docked run in consequence, was not received in Boston post office until today. Moreover the arrival of the Carmania comes between the regular sailings of liners between Great Britain and New York, so that the wait which otherwise would have taken place between trans-atlantic mail shipments was cut from two to four days. If American officials had not succeeded, after efforts continued for a year and a half, in induc-ing the British to use Boston as a mail delivery port, yesterday's mail prob-ably would have been delayed till Thursday or Friday. The difference between the time of the Carmania's arrival and the next arrival at New York will be the measure of service which Boston's new mail schedule offers the Nation.

American mail for some time has been routed to Great Britain by Boston boats when conditions are favorable and sailings fit opportunely, but so far the British office has not made extended use of this port. The transfer of the large, fast Scythia and Samaria by the Cunard Company to the improved Boston route, in which the Carmania has been temporarily placed, has apparently caused change of policy. When comparisons are possible, a report undoubtedly will be submitted to London, showing Boston's advantages and urging continuation of the service so long as conditions remain favorable.

Boston's advantage as receiving point for foreign mail was definitely shown yesterday with the arrival of the Carmania from Liverpool, when city boxholders in the post office got

> by an adroit manipulation of the eco-nomic law of supply and demand." On the rising market many dealers and users were stampeded into hoarding. The rise, however, is not jus-tified by any increased cost of refin-

ing or producing, the report says.

As a general conclusion to its opinfon concerning the New York Sugar he was really keeping all the doors Exchange, the commission says:

Open. But M. Poincaré, in his speech, Exchange, the commission says: In 1922 approximately 6,000,000 tons

In 1922 approximately 8,000,000 tons of sugar, which is more than the entire consumption of the United States, were traded in on the New York Coffee & Sugar Exchange, but only 55,000 tons (less than I per cent of the volume of trading) were actually delivered through the channels of the exchange. Under the rules of the exchange, the seller of "futures" may buy back his exchange contract; the buyer may also sell his "futures" contract. This results in swapping of contracts rather than in legitimate dealing in sugar.

The commission is of the opinion that The commission is of the opinion that the dealings on the New York Sugar Exchange played an important part in the recent thimblerigging of sugar

As a final word in its report, the

commission declares: The price of sugar at present is based upon what the consumer is willing to pay for it. The householders consume directly about 70 per cent of the sugar distributed in the United States. They have, therefore, in their own hands a most effective weapon with which to protect themselves. On account of the ample production of sugar, the con-sumer can bring about a reduction in price by curtailing purchases and cor sumption, as an artificial price cannot be long maintained, if the demand does not absorb the stacks in the hands of producers and speculators.

THEATERS

The Askowith Players

The Askowith Players produced two Oriental plays on Saturday evening at Huntington Chambers Hall. "The Crimson Camellia," was one-act play with musical accompaniment, written and produced by Kunihiko Nambu, formerly an actor of the hiko Nambu, formerly an actor of the Imperial Theater, Tokyo. Mr. Nambu also played the leading part with spirit. Miss Toki Fujita as the village girl, O'saki, looked like a very jolly little Japanese doll come to life. The other play was Rabindranath Tagore's "Chitra," which suffered by him. being Indian in setting and symbol-ism, spoken in English by a cast half American and half Japanese. Unfortunately, Wells Spalding, who was to play the part of Prince Arjuna, unable to be present, so that Miss Bathsheba Askowith had to recite his part as well as playing that of Chitra,

REPARATIONS PLAN

It is true that M. Loucheur did not actually attend the formal meetings, but the formal meetings of the conference only occupied themselves with technical matters, such as distribution of requisitioned articles, which apparently France and Belgium mean to keep in payment of the cost of occupation, giving the helance to the Benpation, giving the balance to the Reparations Commission.

tor in the rise in the price of sugar.
The margin allowed by the refiners for the refining work is not found to be exofbitant. Storage facilities are adequate and conditions in Cuba are reported by competent authority to be excellent.

In its cunclusions, the commission says that "the recent rapid rise in the price of sugar was apparently caused by an adroit manipulation of the ecoduring a conference.

All Poincaré Encourages M. Loucheur M. Loucheur was to be found in numerous social functions and private meetings, at which the real business of the conference was done. So far from M. Poincaré excluding him, he encouraged him. Never before has a person holding no ministerial or official post been so much in evidence during a conference. during a conference.

This is not without considerable meaning, and, when M. Loucheur stood by the side of M. Poincaré at the unveiling of the monument at Dunkirk, the opinion of The Christian Science Monitor representative was confirmed, that whatever M. Poincaré might say, paid a public compliment to M. Loucheur as the eminent representative, who had testified to British friendliness.

It is now certain that M. Poincaré also wishes a policy of interallied ac-cord, which shall be the base of a larger policy of European reconciliawhen speaking of his critics who would take sterner measures. He attacked the Nationalists of the Right. At the same time he made it clear that France meant to hold the pledges. We will not give them up," "against mere promises. We shall withdraw from the newly occupied territories, only in proportion to the pay-ments made." This stalwart reassertion of France's inflexible will was indeed necessary, both for home purposes and to impress Germany, which has supposed that France was weakening. But in spite of such statement, which must indeed be approved, Mr. Poincaré showed a certain reasonable

PAN-AMERICAN DISARMAMENT TO BE ACID TEST FOR PARLEY

Disputes South of Panama Bait Munition Makers-War Inciters Busy—Conference Opportune

Stephen Bonsal, newspaper correspondent and charge d'affaires, has reported wars and conferences fom Bulgaria to China, served in the Mr. Blaine, of course, was pursuing American diplomatic corps from Korea to Madrid, since 1914, when he was Commissioner of Public Utilities in the Philippine Islands, has held many important official posts, being in 1919 American member of the inter-allied mission to Austria-Hungary. His authority to speak or the Pan-American Congress comes from experience gained by a special study of South American problems in many extensive journeys over the

By STEPHEN BONSAL Today when our guides and pilots seem to be baffled by the perplexities of the European situation, when we our gold resources are excessive; tofinancially at least is going fast in a retrograde direction, attention in official Washington as well as in commer-cial New York turns hopefully and a wistfully toward the Latin-American horizon so long ignored. This general attention and deep-seated interest is focused upon the longpostponed Pan-American Congress which, after many delays and vexatious incidents, at last is holding its open sessions at Santiago, Chile.

Nobody has expressed the purpose of this conference more clearly than Charles E. Hughes, Secretary of State As he well says: "It comes at an opportune time and is full of promise for a better understanding and enhanced prosperity among all the peoples of this hemisphere." Again he characterizes it as "the most effective expression of the sentiment of Pan-American co-operation," and he also declares that it "proceeds upon the sound assumption that the republics of this hemisphere have common interests which they desire to promote by taking counsel together." And he concludes with the statement that "their most fundamental interest is

At this conference, as in the now distant days of its predecessors, the world attitude of America once again will defined. Is it to be the old slogan of "America for the Americans" or are we, spurred on by the necessities of the hour, to rise to higher things and declare in the words of that great Argentinian, "America is Perhaps before these sessions are adjourned we will be able to give a direct answer to this leading question, and perhaps not. Certainly obscure features in the situ-

In the Arcadian days before the European catastrophe, when Pan-Americans gathered together, it often seemed to me, an obscure looker-on in the press gallery, that their discussions were of a sentimental, or at times of a purely academic, character. The delegates would wonder, and at times hotly debate, whether Miranda, the precursor of South American liberties, was actually a member of General Washington's staff, or whether with his heart enlisted in our cause, he only aspired to this great honor. And then, of course, the great world changes resulting from the Adams-Canning-Monroe Doctrine, and what would have happened to the Americas and to all Americans had Henry Clay's Panama Americans had Henry Clay's Panama Canning are the severed or Thomas of Alabama, historian-general; Mrs. Fred T. Ranney of Michigan, treasurer-general; Mrs. Lou C. Stevens of Connecticut, reporter-general; Mrs. M. W. Carruth of Florida, librarian-general, and Mrs. Joshua L. Brooks of Massachusetts, curator-general.

These missions are the severed or Thomas of Alabama, historian-general; Mrs. Lou C. Stevens of Connecticut, reporter-general; Mrs. M. W. Carruth of Florida, librarian-general, and Mrs. Joshua L. Brooks of Massachusetts, curator-general.

These missions are the severed or Thomas of Alabama, historian-general; Mrs. Lou C. Stevens of Connecticut, reporter-general; Mrs. M. W. Carruth of Florida, librarian-general; Mrs. Hanger is a Washington Washington's staff, or whether with Congress not proved abortive, were endless topics of conversation and of speculation

But today all this is changed. The world south of Panama has undergone a great transformation in the last ten years. More than that, those who knew the continent south of Panama five years ago must needs rub their eyes as it dawns upon their vision today. To begin with now, at last South America has definite political by no means excessive appreciation of

alliance, that its interests are insepbreeding frontier troubles down there which should be adjusted in our in-terests as well as in the interest of those who apparently, but only apparently, are more vitally concerned. I shall also have to show how the craze for armaments is possessing the governments if not the peoples of our neighbors from Darien to Patagonia.

"Another Sarajevo"

But while admitting these unpleasant signs of war psychology, we must beg to differ from that probably war-mad editor of the Frankfort Gazette, who in a recent double-leaded article in his once important paper announces that he is on the qui vive for, and only waiting to hear the shot fired on the coast of South America that will in his overheated judgment "herald in another Sarajevo.'

Nearer to our own day and of more practical importance at this moment Blaine's South American policy, which and racial hate, is making small, if ensued whenever Pan-Americans came together. His contention that the Eu-Americans will see and embrace the ropean doctrine, and practice, to the effect that to the victors in war belong the conquered territory should not be tago, where disarramment proposals in the midst of the fratricidal war a step forward in this long-delayed between Chile, Peru, and Bolivia, was direction would prove of world-wide always the subject of ardent debate effect. It is an opportunity that

Reference to these things, while not grasp. on the agenda, will be made, unoffi-cially of course, at Santiago, for all the world knows now that had the Blaine veto upon the spoliation of American territory even by American states been maintained the great question of Tacna and Arica, which has distracted the peace of South America for 40 years and only recently after a never have figured as the most per- A. Gaston and Guy W. Currier,

an ideal, however unfairly the politi-cal cartoonists of a somewhat unscrupulous political day talked of nitrate deposits and guano islands. Today our delegates to the conference in Chile may, and it is hoped, will, pursue ideals, but it is to be expected of such a well-balanced and carefully chosen commission that they will also be aware of the solid and exceedingly substantial interest which the people of North America have in the peace and prosperity of the nations to the

Trade Flourishes

They know full well that our South American exchanges every year for the last three years have exceeded in are suffering from over-production value the sum of our whole world and, strange as it may seem to some, trade before the Spanish War, and day when Europe is commercially with the startling fact that during the same period American bankers have financially at least is going fast in a invested in government, in state, and in municipal loans of the countries south of the Isthmus, something like \$500,000,000, or an amount of capital and savings greater than we have invested in state and provincial undertakings of Europe, of Asia and of Africa from the day of our independence down to the outbreak of the World War.

While, of course, minor mistakes may have been made, as always hanpens when cautious capital is forced to venture into a new world, it can stream of American gold that has been countries south of Panama is not in greater jeopardy than are our investments in some other countries of more ancient conservative renown. We are not "wild-catting" down there. Our business pilots, as a general thing, know what they are about, and they are undoubtedly better advised than were their predecessors.

A more copious and a more regular and reliable exchange of news between the two divisions of the continent, although recently marked improvement is shown, is most desirable, and there is every reason to assume that the personal intercourse between the leading men in both sections which creased volume of trade, will soon suc-ceed in smoothing away the few odds

atim the situation of the American countries that are represented at the Conference, and also the three, Mexico, ation which may not all be cleared up. Bolivia and Peru, which, unfortunately, are absent, I must call attention to the great crying need of the whole situation. However successful it may be in other respects, the Conference will have been a signal failure if it does not by a joint resolution resolutely carried out, make it impossible for South America to continue as a dumping ground for the rope can no longer maintain. Unfortunately, some of this "dumping" has already taken place. With but These missions are the avowed or

the secret agents of the arsenals and the munition factories in the countries where their destructive purposes have been accomplished, and their mission would seem to be to transfer at her place in Brookline.

State, Ambassador Jusserand of France, and Sir Auckland Geddes, the British Ambassador, were listed to address the congress tonight.

BUILDERS EVOLVE APPRENTICE PLAN

Policy for Development of Recruits Outlined

More trained men for the building industry of Greater Boston, developed as apprentices of the various trades of the industry, is the object of a nmission on apprenticeship which has just begun operations here. In a conference already held with men from the building crafts, both mechanics and employers, the commission explained its general policies and outlined a method of procedure proposed for developing apprentices

The commission is a general advisory and supervisory body, the detail work in promoting apprenticeship being done by apprenticeship committees in each of the crafts themselves. These committees are composed of three mechanics and three employers, and their work, while dealing in many cases with specific questions involving. mainly individual crafts, is in harmony with the general standard procedure developed by the commission

The commission comprises E. A. Johnson, J. M. Gould and John Walsh, appointed by the United Building Trades Council; J. N. Willcutt, W. H. Oakes and Ira C. Hersey, appointed by the Building Trade Employers' As- the annual meeting will be held, when sociation, and William Stanley Parker, the officers will be duly elected. ator-general.

Mrs. Hanger is a Washington Sociation, and William Stanley Parker, William H. Graves, and Frank M. Gunby, appointed by the Boston Building Congress, to whose initiative the establishment of the commission is due. The president of the commission is Mr. Parker and the secretary is Mr. Graves of the Building Congress appointees, who represent the architect engineer, and material distributor, no directly involved in the problem, but equally interested with the employer

and Labor groups.

Contact of the various apprenticeship committees with the public school authorities will be through the commission, and full co-operation in the establishment of the necessary courses of study required by the different trades has been promised.

EXTENSION WORK ADOPTED DURHAM, N. H., April 16—É ew Hampshire county has voted necessary county appropriations for extension work in agriculture and home economics for the next blennium, according to an announcement by Director Kendall of the State Extension Service. Several of the counties increased their appropriations over the last two years patchly. Grafton past two years, notably Grafton County, which has now arranged for three extension agents covering the Charles E. Hughes, Secretary of boys' and girls' club work...

MASONIC CHARTER TO BE PRESENTED

Royal Arch Chapter, Roslindale, to Be Constituted

Roslindale Chapter, Royal Arch Masons, which has been operating under dispensation, will be formally consti-tuted at the Roslindale Masonic Temple, April 23, by Most Excellent Companion Curtis Chipman, Grand High Priest, and other officers of the Grand Royal Arch Chapter of Massachusetts. This chapter is the latest one to be added to the list in this State and indications point to a large attendance at the meeting, when the charter will be presented.

Joseph T. Paul is excellent high priest of the new chapter; John A. Johnson, king; George Beckford, scribe; Frank E. Frykstrand, secretary; John M. Crysler, treasurer; Ed-ward H. Whittemore, captain of the Fund. On this occasion he is to speak host: Stephen A. Cummings, principal sojourner; John Gillis, royal arch captain: Walter G. Richardson, master of the third veil; Norman Ramsay, mas-ter of the second veil; Nelson Newell, master of the first veil; Harold Duffy

and Fred Fiedler, stewards.

Very few new Royal Arch Chapters have been constituted in Massachusetts since the peak of the interest in them was reached in 1870, following the Civil War. It is today a rare occasion and one that many Royal Royal Arch Chapter officers are fully Prior to the constitution, the excellent high priest calls for one balcers to the stations they have held

MALDEN CITIZENS

Committee Is to Work for Dry Law Enforcement

Citizens of Malden organized yesterday to work for prohibition enforcement. Malden, with one exception, has always voted itself "dry" at municipal elections, but like other of putting down such elements, and organization was undertaken. E. A. Perry chairman, and H. A. Maxwell is secretary. The meeting was called by the

Malden temperance campaign committee, organized for the last municipal election, and was held at the Young Men's Christian Association, Mr. Maxwell, secretary of the com-mittee, presiding. The Rev. W. A. Roselle of the First Baptist Church spoke on the necessity and importance of upholding the Constitution of the United States, and protecting all in the community from the liquor evil. Mrs. Edward F. Wellington, Malden town chairman of the Women's Division of the Massachusetts Republican Committee, also spoke saying that she stood that the Women's Division of the Republican State Committee had

Malden Temperance Campaign Com-mittee and organize it definitely for prohibition enforcement. This will place Malden side by side with other towns who are organizing similar committees. It shall be one of the objects of the members to present the facts about the benefits of prohibition to the public and thus offset the truths and false propaganda of the liquor interests.

PROF. C. T. COPELAND TO GIVE A LECTURE FOR RADCLIFFE FUND

Prof. Charles Townsend Copeland will lecture on Tuesday evening, April 24. at Agassiz House, for the benefit for the first time publicly on "Charles Lamb in His Life and Letters."

Besides his regular work at Harvard and Radcliffe, Professor Copeland holds crowded summer school sessions and gives an extension course at Boston University. He has lectured at the Lowell Institute, is a trustee of the State Library of Massachusetts, holds an honorary degree of Litt. D., and is a member honoris

causa of Phi Beta Kappa. Arch Masons have never witnessed. PROHIBITION ABATES TO OUST LIQUOR PRISON POPULATION

Crime Decreases and Business Increases Under Dry Law, Says Commissioner Bates

There were 218 fewer prisoners in Massachusetts state and county insti-tutions on the first of April this year cities and towns, finds its law-abiding citizens defied and endangered by the bootlegger and the maker of illicit intoxicants. It is with the intention commissioner of the Massachusetts and commissioner of the first of April 1018 year ago, the decrease being largely due to prohibition and better business condihibition and better of putting down such elements, and enforcing the law by actively coperating with officials charged with such enforcement that the present such enforcement that the present corrections was undertaken. E. A. there were 3801 prisoners in Massa-chusetts institutions, while during the month just past there were only 3583.

The constant decrease in the num-ber of persons confined in Massachu-setts institutions during the past 12 months, in spite of minor fluctuations, is seen in the following table furnished by Mr. Bates, which is the total state prison population for the various months: April 3778, May 3862, June 3861, July 3748, August 3824, September 3609, October 3664, November 3625, December 3503, January 3568. February 3523. March 3583. A decrease in both the prison popul

lation of the State and arrests for drunkenness, reaching its lowest ebb in 1920, and since increasing slightly. is also shown by figures at Mr. Bates office covering the last nine years. The figures for arrests for offenses never taken a vote on the promotion question but that 150 of its chairmen of town committees had signed a same period show an almost constant rise. These facts have been explained rise. These facts have been explained a same period show an almost constant rise. These facts have been explained rise.

willing to serve as chairmen because the Republican Party was a dry party and they believed that the State should be a dry State

It was decided to enlarge the Malden Temperance Campaign Committee and organize it definitely for ordinary increase in population, which is about 10 per cent in that period, sets at rest any claim that prohibition has increased crime.

increased crime.

The largest decrease in crime was before the adoption of either war-time or permanent prohibition, which went into effect respectively on July 1, 1919. and Jan. 16, 1920. An unprecedented business boom with high wages and ready employment is the explanation of the depletion of our jails during 1919. the depletion of our jails during 1919 and 1920, but the looked-for rebound, which undoubtedly would have occurred and might well have been driven even higher than the level of 1914, caused by demobilization and industrial de-pression, has been held down, in my judgment, to a considerable extent by the workings of the prohibition amend-

While crime has increased in the last While crime has increased in the last three years, our prison population is still approximately half what it was eight years ago. Bearing in mind that drunkenness is more readily noticed today and the man more apt to be arrested, one will have a partial explanation for the high drunkenness figures. Another, in my judgment, will be found in the confused methods of law enforcement, resulting from a lack of

or the contrased methods of law enforcement, resulting from a lack of co-operative enforcement by the states and the Federal Government.

My opinion is that prohibition has helped to reduce crime and has bettered general social and economic conditions in Massachusetts.

Thousands of women all over the world have indicated their approval of silk gloves by wearing them hroughout the spring and

MANY women have to count usefulness a valuable part of beauty; other women do it anyhow. They find both assets in Kayser Silk Gloves. Many smart women prefer them for warm-weather wearing.

A Choice of Styles

There are as many styles and colors found in Kayser Silk Gloves as there are whims of fashions. Long gloves, short gloves, and gauntlet styles for those who prefer them.

White gloves are worn frequently during the warmer days, or shades of gray, mastic or pongee, etc. You will find all the loveliest of these shades, as well as darker colors, among Kayser Silk Gloves. Every giove has the Kayser double finger-

tips that insure long and satisfactory wear. And in every Kayser Silk Glove are the superior quality of silk, the perfection of workmanship, and the moderate price that always mark Kayser Gloves.

Clean Gloves

Silk gloves are cool-looking, and the hands that wear Kayser Silk Gloves are cool in both looks and feeling.

A bowl of lukewarm water, a froth of mild soapsuds, and you can wash Kayser Silk Gloves as easily as your hands. They must be rinsed carefully, as soap left in silk often destroys the fabric.

Look for the name Kayser to insure getting the best in gloves, hosiery, and underwear.

NEW HAMPSHIRE IS PREPARING FOR ITS TERCENTENARY

Chief Events to Be Held in August in Portsmouth, Dover

CONCORD, N. H., April 16 (Special)
-Celebration of the three hundredth anniversary of the settlement of New Hampshire is being planned by the New Hampshire Tercentenary Commission, which has decided to hold appropriate exercises during Old Home Week nexa August. The fête, to which President Harding has been invited, will open at Portsmouth, where the first settlement was made. On the second day of the celebration there will be exercises at Dover, where the first permanent settlement was made, and on the third day there will he speaking and other observances at

The exercises at Portsmouth will include a pageant of 500 persons. It is also proposed to have a water carni-val in which floats will depict every type of boat built in the city and also the chief events connected with the naval history of Portsmouth, including the work of the Navy Yard. The Ranger, the sloop of Capt, John Paul lones, was constructed in Portsmouth.

The pageant, to be given in the two places of original settlement, will in-Dover. The active participants in the celebration will be the people of Portsmouth, Dover and surrounding towns. lived on Thompson's Island. said to have been some fishermen

Shrouded in Uncertainty

The story of the settlement of New Hampshire has always been shrouded in some uncertainty. Many different versions of it have been related by different historians. It is now generally agreed that the settlement was first undertaken, although not personally performed, by Capt. John Mason of England. Captain Mason received grants of land in New England from the king of England on six different occasions, three times being the sole grantee, twice been a grantee in partnership with Sir Ferdinand Gorges and once being a grantee in associa-

tion with seven others.

The first Masonian grant was in 1621, about a year after the Mayflower landed its colony of settlers on Plymouth Rock and the territory given to Captain Mason alone was called "Mariana." The next year the king granted to Mason and Gorges jointly the province of Maine. In 1629 Captain Mason alone received a grant of New Hampshire, followed 10 days later by one of Laconia to Captain Mason and Sir Gorges again. In 1631 a fifth grant was given, this time to Mason and seven others, and consisting of the territory to be called Piscataqua. The sixth and final Masonian grant was in 1635, some 14 years after the first one, which was to the captain alone and to be named after him, Masonia or New Hampshire.

tory of New Hampshire. This grant was given through the "President and of Exeter, by which the chiefs of the Council of Plymouth, England." It was upon this grant that Captain Mason's heirs later laid claim to the Masonian area, which included most of New Hampshire, and which furnished the bone of contention in a legal controversy which lasted longer, involved more litigants and caused more court procedure than almost any case in the history of the courts of Great Britain and America. Parties to the litigation were born, lived and died, but the suit itself dragged on for about 100 years. It was called the Masonian controversy.

Settlement'in Rye

The State was settled about six years before the grant of 1629 to Cap-tain Mason. The first settlement was in what is now the town of Rye, on the Atlantic coast, where Rye Beach, well-known summer resort, is now situated. Rye was formerly in the territory of the city of Portsmouth, and the original name of Portsmouth was Strawberry Bank, so called because there was an abundance of free responses have been very meage strawberries growing there. The

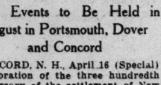

The earliest visits of white men to New Hampshire of which any record is known were those of early explorers to the Isles of Shoals and thousands who now visit those islands in to create more interest in the sub-the vacation season will be interested ject, an increasing number of families to know that there is evidence that the in this city are regarding the test spot now marked by the Tuck Monu-ment and the Smith Monument on Star Island is probably the scene of the first white habitations.

of a seaport river.

Capt. John Smith wrote an account of his visits to the Isles off the New Hampshire coast, and they were for a time known as Smith's Isles. Gosport, the original name of Star Island, was at one time one of the leading towns in New Hampshire.
It was less than three years after

the landing of the Pilgrims that David Thompson, a Scotchman, settled at Rye as the agent of some merchants in England. The settlement was not a permanent one, however, and Thompson subsequently moved to

the state Capitol at Concord.

It is hoped that the new interstate memorial bridge may be dedicated at this time instead of at an earlier datc.

clude a representation of the movement by water of the first settlers from the Atlantic Ocean at Portsmouth harbor up the Piscataqua River to The state commission, which will give to the celebration the official dignity of a state indorsement, consists of Gov. Fred H. Brown, Henry H. Met-calf, Senator Arthur G. Whittemore, former Senator Charles S. Emerson, Representative Harry T. Lord and J.

changed to Dover after the English city of that name.

Salt Works Established The Portsmouth settlement did not amount to much until 1630 when Captain Mason sent over from Eng-land some supplies and some additional settlers. A man named Chad-bourne built the Great House, which he named Mason Hall, and one Williams became Governor of the settlement and in charge of the salt works, which was the first industry in New Hampshire except the primitive one of fishing and hunting. A regular Government was set up, and in 1640

lived on Thompson's Island.

During the same year, but some

two brothers. Edward Hilton and

from England, came with their fam-

ilies to what is now the city of Dover, and made a permanent settlement at

Hilton's Point. The original name of Dover was Wecohannet, and this was

settlement

time after the Thompson

the first church was built.

The Dover settlement also began to expand after 1631, and a large number of settlers came over from Eng-land. A Government was set up in Dover and in 1634 the people of Dover built the first church in New Hampshire, six years before the church was built at Portsmouth. A minister came to preach, but he was so poorly supported that one year after the church was built the minister was compelled to forsake his parish "for want of

adequate support."

The third settlement was at Exeter. In 1638, the Rev. John Wheelwright and a party of religious followers who had been banished out of Massachuhim, Masonia or New Hampshire.
Only one of these grants stood the test of time. That one was the grant of November 7, 1629 in which Captain number of 50 or 75 people. There is a treaty and deed, dated in 1629, which Mason alone was granted the terri-Wheelwright settlers a large part of what is now southern New Hampshire. But this Indian treaty is now regarded as a brazen forgery.

The fourth settlement was at Hampton, where now is Hampton Beach, the largest summer resort on the North Shore. This settlement was regarded from the first as being a possession of Massachusetts and was the subject of

During the early years these four original settlements set up their own forms of government, all of which recognized allegiance to England and a certain community of interest among themselves.

ONLY ONE APPEARS FOR FREE SCHICK TEST

HAVERHILL, Mass., April 16 (Special)—Notwithstanding the publicity given to the offer of the Board of Health to administer the Schick test in number. It was announced that name was changed to Portsmouth in order to give dignity to the place and to describe its situation at the mouth of a second river.

AFFIDAVITS TELL OF OPEN SALOON

Springfield Conditions the Subject of Address by Anti-Saloon League Official

SPRINGFIELD, Mass., April 16 (Special)-Asserting that the fundamental desire of the Anti-Saloon League is to arouse Springfield citizenship to the gravity of existing conditions in this city, Arthur J. Davis, regional superintendent of the Anti-Saloon League of America, addressed a large congregation at the First Baptist Church yesterday morning. Mr. Davis read three of 30 or more affidavits obtained by investigators for William A. Forgrave. district representative of the league, which indicated that bootlegging and gambling is being conducted openly in the city.

The affidavits read by Mr. Davis alleged that on one of the main streets of the city there is a regular saloon with a bar at which liquor is sold openly, that on the same street there is a pool room in which young men congregate and in which gambling and liquor selling takes place, that on another street there is an extensive gambling establishment at which bootleggers' prices, quantities and places of delivery are discussed and deals

"The plan that is being worked out in Springfield by Superintendent For-grave," said Mr. Davis, "has been care-fully considered and is based upon many years' experience in all parts of the country. Somebody has said: Throw a searchlight into a rat-hole and you spoil it for rat purposes.'
The searchlight of publicity has been thrown into a number of Springfield

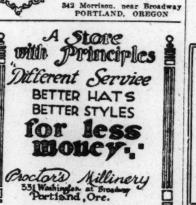

Conditions described by Superintendent Forgrave have aroused the lawabiding citizens, who propose to insist upon a general cleaning up. Following
14 raids made last Friday night, in
which considerable quantities of liquor
and one still were confiscated and 16
arrests made, the police issued a statement that this activity was not the result of the exposé by Superintendent Forgrave, who had submitted his affidavits to the police board, but the outcome of evidence which the police had been gathering for some time.

Notwithstanding the apparent reluctance of the authorities to enter into a co-operative movement with Anti-Saloon League representatives to put a stop to bootlegging in this city, it is regarded as especially significant that Charles H. Wright, district attorney, Chairman Hubbell of the police com-mission and Chief of Police Quilty have been in conference over condi-tions, though strained relations have and the district attorney's office for some time.

finished a non-stop run of 573 hours at full power, operating continuously, 24 hours a day without a hitch, for more than three weeks, is worthy of far more attention than it seems likely to receive from the general public. It marks a triumph of American determination and genius in design and construction. The imporrealized if it is compared with prevthe extraordinary rapidity with which of the airplane engine has been increased and the excellence of its present performance in all respects as measured against the qualities of internal-combustion engines for other types of service.

When the Wright brothers made their first flight, a score of years ago, the effective life of an aircraft engine almost had to be measured with a stop-watch, whereas we are now approaching the point where it can be measured with a calendar. There are few records of the performances of 1903, but we do know that the power developed began to drop off almost from the instant when the engine was started, and a non-stop run of two hours under flight conditions would have appeared as a remarkable achievement. The improvement of the next few years was very gradual, and in 1910 and 1911 iblic exhibitions of flying began to be given in America, it was still a commonplace necessity, accepted without question, that the enne should be dismantled and overhauled after every 10 or 15 hours, except in the case of a few exceptionally rugged and heavy types closely based automobile practice.

With the coming of the war, and the necessity of sudden tremendous increase of production, came the first attempt at the setting of a standard of to about 55,000 miles of flight at maxidurability, and a seemingly satisfactory requirement was soon found in a 50-hour running test, carried out under rather vague and variable specifications. In some cases nothing was exacted except that the engine should run a total of 50 hours without total collapse, an almost unlimited number of stops, with extensive repairs and replacements at each one. stops was gradually reduced, but even at the present time it is rare for any European Government to ask or to receive a continuous test run of more than 10 hours with fully open throttle accomplished at reduced power, corresponding to cruising conditions. There has been a gradual stiffening up everywhere, but even the type tests of the British Air Ministry, considered very severe, do not require any single run lasting more than the tradi tional period of two days and nights.

Responsible for Forced Landings been so little raising of the standard of durability during the whole period from 1914 to 1920, attention having Rhine. concentrated on getting more power for less weight, for the amount of trouble which resulted from power from the harbor on which it is deforced landings, with the consequent The newly occupied area of Mannindeterminate delay in completing a trip started by air and having to be finished by land, is one of the greatest from unoccupied Germany, as well as tories of Leipzig and Hamburg. The newly occupied Germany, as well as tories of Leipzig and Hamburg. The from the other countries of Leipzig and Hamburg. The property considerable of the countries of the from the countries of the process of Leipzig and Hamburg. obstacles in the way of successful commercial flying. The actual number of forced descents has been kept very small, to be sure, but it has only been done by unceasing vigilance, by keeping a large staff of mechanics of exceptional skill, and by overhauling the engines thoroughly at short intervals.

Under more ordinary conditions of operation, such conditions, for example, as would be likely to prevail when the private owner of an airplane operated and cared for it himself, the pilot was never able to feel that supreme confidence in his power plant which would enable him to forget its existence entirely, to disregard the possibility of engine failure as completely as he was able to disregard the possibility of collapse of the wing structure on a

properly-designed airplane.

The liability of trouble when exceptionally long runs had to be made at full power is sufficiently indicated by the fact that fully half the attempts establish new duration records with airplanes in the last four years have been terminated by power plant trouble, usually in connection with the

lubrication or cooling system or som THE performance of the Wright major part of the engine stucture, before the fuel carried was exhausted.

Navy Raises Standard It was from the United States Navy that the impulse toward the production of engines with a longer life finally came, and the results of the work done at the instance of the Bureau of Naval Aeronautics will be felt in future in the design of every airplane for every purpose, military or commercial. About a year and a half ago Lieutenant Leighton, in charge of the development of aircraft engines for the Navy, and his associates raised the initial test require-ment from 50 hours to 300 at a single jump, with 42 hours of that time to be run at full power, and it was a surprisingly short time before engine designers had met the new test. The next step was to require that the whole 300 hours should be run at full throttle and without a stop, and that marvelous performance, beyond the

wildest dreams of a couple of years ago, now seems to be gaining-acceptance as an ordinary standard.

The most remarkable thing about the improvement is the relative slightness of the changes in design which vere required to obtain it. It has seldom been necessary to strengthen crankshafts and other highly stressed parts in such a way as to increase their weight. Minor changes in valve gear layout, in form of niston head. uting the incoming gas between the have sufficed. The result is that the weight per horsepower is, if anything. less on the new engines than on the

Compared With Automobiles

Such durability and reliability as has recently been demonstrated is without precedent not only in air-planes but in terrestrial vehicles. Five hundred and seventy-three hours of running at full power corresponds mum speed, for a typical commercial airplane, three times around the earth 30,000 miles at 50 miles an hour. The wear on the mechanism in such a run first tried and demonstrated to would be at least as great as during sible in America about a year ago.

twice the distance at usual touring speeds, and the car which will go for 60,000 miles on the road, from five to 10 years' driving for the ordinary private owner, without requiring any work on the engine, has not yet been built. The locomotive, under regular service conditions, falls almost as far short of reaching the airplane engine's level of attainment, although the locomotive will, of course, stand the locomotive will, of course, stand more successive overhauls and has a greater total life than any aircraft

ower plant. ough has perhaps been said to prove the practical importance of the test just finished. It remains to bring all engines to the same level of excelfool-proof, so that the attention required between flights will be reduced to a minimum and so that no excep cionally skillful or careful handling by the pilot will be required to obtain the maximum of performance. Progress in those directions should be rapid

Making New Speed Records

The record recently set up by Lieutenant Maitland, falling short of four miles a minute by only a frac-tion of a mile an hour, will stand permanently in its class, as the official length of the course for speed trials has now been increased to three kilometers in place of one. While the four-mile-a-minute mark will undoubtedly be reached ultimately, even on the longer course, the difficulty of attaining it will be much increased flying straightaway speed trials it has been the practice of the pilots to dive steeply just before entering the course. The momentm ac quired in the dive served to increase the speed for a short time after leveling off, and momentum obtained in that way will be of decreasing service as the length of the run is increased. The new and longer course will give truer approximation to the speed of the airplane without assistance from gravity, and will also make it possible more accurate timing.

The fact that gravity reinforced the engine power does not in any way decrease the relative importance Lieutenant Maitland's record, as the balcony of St. Peter's; the presence same method of flying has been used and speech of Cardinal Vannutelli countries, and the Curtiss army racer time. Incidentally, it is interesting to note from French descriptions of the machine with which Sadi Lecointe regained the speed record from General in the latitude of Boston. The same Mitchell, to lose it again to Lieutenant duration in an ordinary touring car Maitland within a few days, that the would permit the covering of nearly principal technical modification had 30,000 miles at 50 miles an hour. MUSSOLINI DRAWS **CLOSER TO VATICAN**

Reciprocal Courtesies Extended -Parliamentary Hostility of Roman Catholics Subsides

Vatican are daily becoming closer, for no disclaimers on the part of the Vatican official organ can lessen the importance of the visit paid by Signor Cremonesi, accompanied by the chief of his Cabinet, to Cardinal Pompily. Signor Cremonesi was elected Mayor of Rome last year, and when the Roman municipality was recently dissolved by the Government, he was made Royal Commissioner for the capital. Car-dinal Pompilj is the vicar-general of the Pope, in the latter's capacity of Bishop of Rome. Thus the two men represent, one the civil and the other

ecclesiastical, jurisdiction over Crispi, in 1887, dismissed Duke Leopold Torionia, then Mayor of Rome, because he had congratulated Pope Leo XIII, upon his jubiles. Now Signor Cremonesi, who is a Royal Commissioner, not elected by the Commissioner of the mon Council but nominated by the Government, goes with its obvious approval to pay his respects to the papal representative, immediately after hav-ing made his official calls upon the King and the Premier!

Only One Incident of Many Nor is this an isolated incident, for

it comes after Signor Mussolini's pre-vious overtures to the Vatican, the restoration of the crucifix in schools, the resumption of religious teaching, the expulsion of all Fascisti who ar Freemasons; while, on the part of the Vatican, there have been the Pope's initial act of blessing the people for the first time since 1846 from the outer by all would-be record breakers in all Dean of the Sacred College, at the Finzi wedding at which the Premier has again proven itself the fastest was also present, and the speech of machine in the world at the present the new Archbishop of Messina. the new Archbishop of Messina.

had visited Rome since Canute in 1027 until Edward VII's arrival. But the present Prince of Wales called upon Benedict XV in 1918 and Pins XI is more favorable to England than was his predecessor. Of recent years the number of legations to the Holy See has much increased, although that of Greece has been discontinued.

Signor Mussolini, in this policy of econciliation with the Vatican, is only ROME, March 28 (Special Correspondence)—The relations between the Mussolini Government and the Vations are since 1904, although he has made more stir about the matter than they. Signor Giolitti was the first to see that the Roman Catholic vote was worth having, and was willing to make miers since 1904, one alone, onnine, was hostile to the Vatican; several such as Signor Orlando were extremely friendly. Then came the advent of a small Roman Catholic party, which never exceeded 24, then of the present large Popular Party in 1919. The annexation of the new provinces accelerated the movement, for the Trentino is solidly Roman Catholic, and the Upper Adige likevise. Besides, as So at any rate momentarily, crushed by ascismo, the Populars are the only powerful party except the Fascisti, for united. No one in 1870 would peraps have anticipated this state things; but so it is. It is apt to be forgotten, especially by non-Italian Roman Catholics, that, on its political side, the papacy is, and has been since the Avignon captivity, exclusively an talian institution, run by Italians on Italian lines and by Italian methods. Since 1523 every Pope has been an Italian; the Cardinal Secretary of State and about half of the Sacred College are always Italians. Thus, on its political side, the Vatican has naturally and inevitably racial Italian affinities. This racial sympathy it is which, despite 1870, makes it easy for the Vatican and the Quirinal to under-stand one another. This it is which gives them common interests Palestine and the East generally.

REFERENDUM ON TAX SOUGHT IN OREGON

REAL COMPETITION IS DUE IN THE NATIONAL LEAGUE

At Least One Club Is Expected to Give the Champions

At the outset of the National League to whether Boston, Brooklyn or Philaseason of 1923, which opens tomorrow, delphia will finish in sixth place. All the forty-eighth in the history of the three have been strengthened somethat New York has an excellent chance | lar ownership, a star collegian shortof repeating its success of 1921 and stop, a veteran first baseman, and a 1922, but that, on the other hand, one recruit outfielder; the Superbas by the 1922, but that, on the other hand, one club, or possibly two or three, will give the Giants one of the hardest fights experienced in many years. It is with this expectation that the fans infielder Arthur Fletcher), a first baseman, and a shortstop.

date tomorrow.

A race in doubt until the final month may always provide an upset, and fol-lowers of the Reds, in particular, are confident that their team has just that balance of power that will count in dispossessing the world's champions in the final lap of this year's baseball Marathon.

Like his less fortunate rivals, Manager J. J. McGraw has not been content to start afresh with the same lineup with which he fin'shed in 1922. Two newcomers to the Giant fold have been tendered an impressive welcome in the south, and in the metropolitan pages the names of John sport pages the names of John Bentley and James O'Connell are perhaps as well known as any others among the new army of recruit players in either major league. Bentley is a versatile star, and was the man me sought after in the International League up to the time New York was able to arrange the deal with Balti-To be rated as a pitcher and first baseman, and A-1 at either position, is a qualification that has appealed very strongly to the Giants' manager, since the team can admittedly stand more box strength, and a good all-around first baseman is never sidered the finest outfielder on the Pacific coast for the past couple of seasons, San Francisco having sold his services a year ago, and retained him for further development through last season. Just whether McGraw essay to make an infielder out of Bentley, or count him among regular pitchers, is still an open question. He has a good first baseman already in the person of G. L. Kelly, and indications are that Bentley, the new regular. will be given a permanent assignment in the box, where he appears to be most needed. If the Giants can slip over a couple of additions to their pitching staff as they did during last season it may be another story. Reports have it that O'Connell's value, on the other hand, is still negligible, and the champions' outfield problem still is evident. Now that E. J. Roush, the stellar

center fielder of the Reds, is again within the fold, P. J. Moran's charges present a more formidable front than It was claimed out at Redland Field that with or without Roush, Cincinnati would present a better front than any of the other western clubs. And, since the strength of the challengers in the National League seems centered beyond a doubt in the west, Cincinnati is the one club looked upon to shatter, if possible, the Cincinnati is the one club present New York monopoly. Last season Manager Moran developed a string of youthful pitchers, youthful at least in point of service, that rethe Reds nominally in the chase. Now it is said to be a different story, with his boxmen not showing quite as much That the return of J. E. Daubert, veteran first baseman, will add still of the two teams. They were seven-greater power to the team's defense inning contests by agreement. greater power to the team's defense and offense goes without saying.

So much misplaced faith has been pinned in Pittsburgh for a number of seasons that fans outside that city now generally refuse to concede it a leading place. Yet the fact cannot be overlooked that Pittsburgh is as formidable, on paper, as in seasons past. In other words, man for man it appears to outdistance the field, with the exception of the champion Giants. There has been that "some-thing" lacking, though, in the efforts of various managers to place Pitts-burgh at the top rung. It may be a lack of co-ordination, or of team play when it is most needed, but whatever the reason, Pittsburgh for more than double by J. T. Branch '25.

Ames scored the winning run in the sixth, when J. E. Gragg '2 took a base on balls and scored on double by J. T. Branch '25.

Ames scored the winning run in the sixth, when J. E. Gragg '2 took a base on balls and scored on double by J. T. Branch '25. driving power necessary to carry it through to a pennant victory. Naturally, its supporters are hoping that this season will tell a different tale.

Chicago is the third of the western contenders that seems justified in expecting at least a first-division berth. A number of new faces were seen at the North Side park last year, and several of the newcomers have fitted very nicely into Manager William Killefer's scheme. This team, com-posed mainly of second-year major posed mainly of sections in new roles, such as M. J. Krug, has had a whole season working together and as a consequence should display a fast brand of ball. A great deal will depend on the second base, he hit a home run that ended the contest.

The Red and Green had scored a man of the first two innings in each of the first two innings.

consistent battle, it may seem strange the case of a team that went along strongly with a pennat in sight, but crumpled, for no apparent reason, when its pennant hopes were forgone. It is unreasonable to expect too much of a club that allows second place, and then third, to slip from its grasp at the very end of a season, when it has been picked by many to sail into the lead and stay there. The Cardinals may come back, and in their efforts will undoubtedly have the well-wishes of many outside of the Mound City, but they will have to show more persistency, as a team, than they did in 1922. Rogers Hornsby, great as he is, cannot do the work of a whole ball club.

For the others in the race in name

at least, it seems at this end of the season to be a great uncertainty as

Yale Leads Eastern Colleges for Honors

Elis Enjoy Good Intercollegiate Indoor Sport Season

NEW YORK, April 16 (By The Associated Press)—Yale University cap-tured the bulk of honors in eastern intercollegiate indoor sports during the season which closed last week with the fencing championship.

Aided by an unusual array of allround talent, the Blue captured team championships in basketball and swimming, finished second in water polo and third in wrestling. Harvard University led the way in hockey and States Military Academy won two fencing titles and the United States Naval Academy retained its supremacy

in gymnastics. Other team champions were: University of Pennsylvania, in track and field; Cornell University, wrestling, and Princeton University, water polo. Yale opened the season with a basout of place. O'Connell has been consurprising strength and upsetting the favorites, Princeton and Cornell, who tied for second place. Columbia Unjversity was fourth, Dartmouth College, another pre-season favorite, fifth,

nd Pennsylvania last. The star Eli swimming team easily won first place in the league race, showing a clean slate of eight victorchief individual honors in the swim-

ming championship meet, Cornell's matmen took the wrestling title after a close contest with Pennthird.

Pennsylvania, strongly fortified in field events, won the track and field championship by a narrow margin from Cornell, former titleholders, with Dartmouth third.

the title for the fourth successive year, with Princeton second. Harvard won the folls title at fenc-ing, but Vest Point, competing for the first time since 1912, captured both epée and saber team events. R. W. Davenport, Yale, John Pesek and L. V. Castner were victorious in the indi-vidual epée and saber contests, re-

Our Supplies Make Records

BRITISH FACE A HARD SEASON

Powerful United States Amateur and Professional Golf Invasion to Take Place Soon

LONDON, April 15 (By The Asseciated Press)—British golfers probably face their most strenuous season, meeting the Americans for both amateur and professional honors.

here at the end of April to meet Great Britain in the international match for the Walker Cup, will be welcomed by the Oxford-Cambridge University Golf-

The first week-end will probably be spent at Rye, where the Americans will play a match with former Oxford-Cambridge golfers who will later compete in the cup contest. This group includes C. J. H. Tolley, C. V. L. Homan and E. W. Holderness, amateur

It is hoped that the Americans will participate in the succeeding event, the St. George's Challenge Cup match on the Sandwich links. This is considered the chief scoring event of British

British commentators point ou that there is a strong possibility this event will go to the Americans, who, they

ay, specialize in score play.

After this meet the United States visitors are expected to go to Deal for the championship match. Previous to their final endeavor they will watch the annual struggle between England and Scotland, which is expected to determine the players who will op-pose the Americans in the Walker Cup match.

During the coming week at Purley Downs the qualifying round for the southern section, £1000 professional competition will be played. All the big professional players will compete. The finals, to be played a month later at Lytham near Blackpool, are expected to give a line on the world's open hampionship at Troon in June.
Little has been seen of Abe Mitchell

George Duncan, his traveling companon, is playing well. These two are expected to uphold the honor of Great Britain in the championship.

CHICAGO, April 15 (By The Assoles. Princeton finished second but clated Press)—R. A. Gardner captain gained additional aquatic honors by of the term of American amateur winning the water-polo title. Leo golfers, who will invade Great Britain Giebel of Rutgers College, won the next month to defend the Walker Cup golfers, who will invade Great Britain and contest the British amateur gol title, departed for New York today, Charles Evans Jr., a member of the team, and like Gardner, twice amateur sylvania State College and Yale Uni-versity, which finished second and join Gardner in New York before the champion of the United States, will team sails Tuesday.

S. D. Herron, another Chicago member of the team, who won the American title three years ago, is now in his o'd home city, Pittsburgh. He will go from there to New York to embark for England. G. V. Rotan of Texas is also on his way east, and the other western team members, H R. Johnston of St. Pau', O. J Wright of Los Angeles and Dr. O. P. Willing of Portland, Ore., will soon be on the eastern sea-

There are 11 men in the American contingent, but three of them will serve as substitutes, as only eight players will compete for the Walker Cup. The four eastern players are Francis Quimet of Boston, Max Marston of Philadelphia, Oswald Kirkby of New York, and J. W. Sweetser of Yale, national title holder, who only recently received permission from his

university to join the invaders. Which three players will act as substitutes may not be determined until the golfers reach Great Britain

Jock Hutchison, professional at the Glen View Club, Chicago, who won the British open title two years ago, and finished in third place, two strokes behind the winner, W. C. Hagen, last year, today finally announced that he would be unable to go to Europe this year to renew his attempt to recover the title. He will compete in a fourball match at Westchester-Biltmore, with Eugene Sarazen against Hagen and J. M. Barnes, formerly national open champion, on April 28-29.

CANADA LOSES ARMSTRONG WINNIPEG, Man., April 16 (Special) - Lawrence Armstrong, Manitoba's champion sprinter, entrained for Chicago yesterday afternoon, where he will hereafter make his home. Armstrong won fame last year when he equaled the world's record for 50 yards, and at the same time set up a new Canadian mark. He won the Manitoba cago several months ago, where he is running under the colors of the Illinois Athletic Club. Armstrong said before leaving that he expected to join his old made 6ft. 1% in. in the high jump. team mate and perform for the same club.

SYRACUSE HELD TO TIE NEW YORK, April 16—The lacrosse teams of Syracuse University and Crescent A. C. played a 1-to-1 tie on the Crescent field, at Bay Ridge, Saturday. The collegians played an excellent game and displayed unexpected strength in holding the local team to a tie.

English League Race Acutely Interesting

Liverpool Seems Likely to Repeat Last Season's Triumph

LONDON, April 16—Now that the end of the season is in sight, the race for the premier honors in the first and second divisions of the English Association Football League becomes acutely interesting. At present the Liverpool team seems likely to repeat last season's triumph by heading the final standing in the upper section. It went to the head of affairs in the second week of September, and has re-tained that position ever since. In doing so it has accomplished a vastly creditable task for Sunderland, Hud-Villa and Everton, which today follow in the order named, have made great efforts to overhaul the chamcupied second place since they first acquired it in November, can claim a total of 52 points—three less than Liverpool and three more than Hud-dersfield—but as only three or four matches remain to be played, it is unlikely that the present leaders will be displaced. At the other end of the standing there is a question of relega-tion to be considered. Stoke and Oldham Athletic appear the most likely sides to descend to division two next season, although Chelsea and Notts Forest are unpleasantly close

Bolton Wanderers in the cup final at Wembley, April 28, is only two points behind the leader, Notts County, and and Richards at 6—2 6—2. has two matches in hand. This makes NORTH AND SOUTH TENNIS 'Hammers" 'ambition of winning both the cup and promotion in the same

eason seem quite attainable.
They, like the third and fourth teams, Leicester City and Manchester United, respectively, have 47 points against Notts' 49, and hold second place on the list by virtue of their

goal average.

Next in order are the Blackpool and Fulham teams. Turning to the other end of the standing one finds Wolve hampton Wanderers certain to be relegated and either Clapton Orient or Stockport County apparently destined to accompany then

RICHARDS HOLDS TWO MORE TITLES

Captures the North and South Singles and Doubles

PINEHURST, N. C., April 16-With two more tennis titles to his credit, Vincent Richards appears to be well on his way to many championships this summer. Richards now holds three national titles, the Juddor doubles, with W. T. Tilden 2d as a partner, and the indoor doubles, with F. T. Hunter as his partner in the latter. Hunter as his pariner in the latter. To these he added two of the leading m'nor championship titles here Sat-urday by winning the North and South singles and, with S. H. Voshell, taking the doubles. In the mixed doubles, with Miss Ceres Baker, Orange, N. J., as his partner, he

Richards did not win the North and South singles without a struggle. After winning the first set, 6-3, he dropped the second with the score reversed. The third he took at 6-4 after Voshell had made the score all by winning three straight games.

Richards and Voshell dropped the second set of their five-set match with Josiah Wheelwright and R. B. Bidwell in the doubles, and then won the third, after going to deuce, at 7-5. They finished the match with the fourth set at 6-3.

Miss Helen Gilleaudeau won women's singles by defeating M s. E. W. Raymond of New York, 6—2, 2—6. to the foot of the table. Notts Forest and Stoke rose to the first division Miss Marian Chapman of Nyack, also only this season.

The situation in the lower section Mrs Theodore Sohat of Brooklyn and is particularly interesting. Here West Miss Ceres Baker of East Orange. Ham United, which will oppose the The score was 6-3, 6-3, 6-2, and Miss Gilleaudeau and Bidwell the mixed doubles from Miss Baker

CALIFORNIA HOLDS A FIELD DAY AT STANFORD'S EXPENSE

Varsity Wins Tennis, Baseball and Wrestling Contests, While Freshmen Take Track and Baseball

The supremacy of the Bears was shown first in the annual tennis matches, in which the best from both institutions participated. The Californians won three out of five matches. They took two of the three single matches and one of the two double

W. J. Bates, California, one of the stellar collège racket performers in the United States, was the individual star of the day in both the singles and doubles. Bates deteated N. J. Deback of San Francisco in a fine match after Deback had threatened him seriously in the first set, which Bates took, \$-5. Bates recovered himself and won the second handily at 6-3.

In the doubles, Bates paired with Gerald Stratford, defeated the two Cardinal stars, V. T. Merts of Chicago and R. H. Hindkley, captain of the team, from Hollywood, in fast matches. Although the play moved right along the Californians were never seriously threatened here. In taking this competition, the Bear termis men repeated W. J. Bates, California. one of the

threatened here. In taking this com-petition, the Bear tennis men repested last year's performance when, at Berkeley, they beat the Stanford play-ers by the same score. The players from both teams will meet again dur-ing the year in the state title matches, which were won by Stanford rack-eteers last season. The summary: SINGLES. First Bound

eteers last season. The summary:

SINGLES—First Round

W. J. Bates, California, defeated N. J.

Deback, Stanford, 3—5, 6—3.

P. A. Bettens, California, defeated R. H.

Hinckley, Stanford, 6—4, 3—6.

V. T. Mertz, Stanford, defeated Weinstein, California, 6—1.

DOUBLES—First Round

W. J. Betterned, Caralla Stratford, California, 6—1.

W. J. Bates and Gerald Stratford, Cali-fornia, defeated F. T. Merts and R. H. Hinckley, Stanford, 6-4, 7-5. F. M Tussing and N. J. Deback, Stan-ford, defeated David Courad and B. A. Coombs, 6-3, 6-3.

The University of California base-ball team defeated the Stanford nine in the afternoon in the closest and hardest game ever played by teams of the two institutions. While the Cardinals never led the Bears, the score was tied at the end of the inning, three extra innings being necessary to decide the game, and incidentally the annual series.

E. B. Kelley, Bear pitcher, deserves the credit for the victory, and the story of the game can be told by a recital of the twelfth inning. Both teams had made one run in the eleventh and the score stood 8 to 8. NORMAN, Okla., April 16 (St. al)

—University of Oklahoma nine on
the two-game Missouri Valley Conference series with the Kansas State field and was caught out. B. A. King. Agricultural College by winning, 8 to shortstop, bunted and beat the ball 3, here Saturday. This war Oklahoma's to first. Capt. W. A. Hermi was fifth victory in the conference, com-pared to one loss. The Sooners will not play at home again until May 11 and 12, when the Washington Univer-Thempson went to bat, and on the first pitched ball King stole second. Then Thompson singled to center field and King raced home for the

winning score. was hit by Kelley's first pitched ball.

By taking today's game the Bears won the thirty-second annual contest between the two universities. The score by innings:

Innings - 128456789101112 R H E alifornia. 222010000 0 1 1-9 16 6 tanford. 030200101 0 1 0-8 7 5 Batteries-Kelley and Thompson; Solo-EXCLUSIVE women's garments carefully selected, moderately SUITS, DRESSES, COATS AND BLOUSES

STANFORD UNIVERSITY, Cat., April 16—University of California athletes held a field day on the Leland Stanford Junior University campus Saturday, taking home with them evidence of victories over the Cardinal representatives in annual contests in baseball, tennis and wrestlings. The supremacy of the Rears was trained for home a little later. The mon. League and Fatterson, Fuller, Dispires—Schaller and McCox.

To Ruish the day's show the California wrestlers won four matches, and lost one in their dual meet with Stanford in the evening. The entire show was over in less than a half hour, and the Baars were on the train for home a little later. The Californians proved too strong for the Stanford boys, with the exception of V. M. Hosepian '22, who won his event in the 125 pound class for the fourth consecutive year. Hosepian has lost only one match in four years, and that to a non-college man.

Hosepian proved his right to the intercollegiste title by throwing Cooley in 2m, 10s. In the forfeited match Stanford had no one in the 175-pound class to meet the California representative. The summary:

Just to keep pace with their older brothers, the California freshmen deleated the Stanford first-year men in track by a score of 93½ to 27½, and in baseball by a score of 4 to 2, also on the Stanford campus.

CHICAGO DEFEATS NORTHWESTERN, 3-1

Special from Monitor Bureau CHICAGO, April 16-University of Chicago opened its baseball season in the Intercollegiate Conference, Saturday, with a 3-to-1 victory over Northwestern University at Evans-ton. Due to snow, rain and mud, the game was called after the sixth

Ray Arndt '25 of the Marcons made his "Big Ten" pitching debut aus-piciously, holding the Purple well in hand most of the way. Three hits by himself and teammates brought in the runs against C. W. Palmer "no-hit" fame and drove him from the box. In view of the conditions, the game was well played. The score by innings:

Northwestern 0 0 0 1 0 0—1 2 1 Batterles—Arndt and Yardley; Palmer lengsten and Stegman, Osher.

TENNIS MATCH A TIE PROVIDENCE, R. I., April 14—The tennis season at the Agawam Hunt Club in East Providence opened today with an informal match between the Harvard varsity and Providence members of the Agawam and other country clubs. The day's play resulted in a 3-3 tie, because darkness prevented finishing the final doubles match.

United States Championship Tournament Opens at St. Louis With a Record Entry

ST. LOUIS, Mo., April 16 (Special) The woman's national bowling tournament opened at the Washington Alleys, this city, Saturday night with a record entry. The entry of 106 five-woman teams is 24 more than competed at Toledo last year. Forty-six teams are entered from St. Louis; Chicago and Cleveland have entered nine each; while numerous other teams are entered from Indianapolis; Toledo, Milwaukee, Kansas City, Detroit, Omaha, Albany, Oshkosh, Columbus, Minneapolis, Rockford, Peoria. Council Bluffs, Fort Wayne, Racine

About 10 days of bowling, some days as many as 15 hours, other days 10 hours, will be required to complete the schedule.

Before the balls opening the tourna-ment were rolled, short addresses were delivered by Mrs. Zoe Quinn of Chi-cago, president of the National Association; Mrs. M. Kelly Jr. of St. Louis, secretary, and Mrs. George Meyer. president of the local association.

Following the addresses of welcome, the tournament was officially opened by five-woman teams representing six local lodges of the Order of the Eastern Star. Of this group the team of the Order of the Eastern Star, captained by Mrs. C. Gallew, was high with a total of 1561. However, the Deusenberg team of the second squad captured first place among the fivewoman teams bowling the first two Their total was 2018. The highest individual score of the team was 489, made by Mrs. E. M. Gassner.

Among the doubles teams that bowled Saturday, that of Mrs. A. Martin and Mrs. R. Mees was high with a total of 858, Mrs. Mees bowling The team composed of Mrs. F. Schlessinger and Mrs. G. Kemperlew was a close second with 817, Mrs. Schlessinger bowling 458.

Mrs. A. Martin in addition to being a member of the leading doubles team also took the lead in the singles Saturday with a score of 499. Her games were 183, 188 and 128. Mrs. E. Dickens was second with 473 and Mrs. G. Temperle, third with 469. The bowling up to yesterday has been by

BASEBALL ON ITS WAY TOMORROW

Boston Nationals Inaugurate the Season at Home

Boston baseball fans are eagerly Boston baseball fams are eagerly awaiting the opening of the major league season at Braves Field tomorrow afternoon when the Boston Braves cross bats with the New York Giants, champions of the world. Especial significance is being attached to this opener, since this is the game which Commissioner K. M. Landis will attend, a favor brought about through his close friendship with the Braves. his close friendship with the Braves new president, Christopher Mathew-son. A self-styled "Get Behind Matty" committee, of which Maj. C. J. Swan is chairman, has volunteered to help make the Boston opener a signal success.

The ceremonies in this city will have a decidedly military aspect, with num-bers of soldiers, sailors and marines to take part. More than a score of newlydecorated war heroes will attend the game as guest of the Braves' manage-ment, and will lead the parade to the flag pole. Gov. Channing Cox and Mayor J. M. Curley are to occupy adjoining boxes. They will form the initial "battery," according to plans, with the Governor tossing the ball and the Mayor acting in a receiving ca-pacity. President Mathewson, Vice-Pres. E. E. Fuchs and James Macdonough, a Braves club director, will keep

Commissioner Landis company.

Weather permitting, the gates will be til 3:15, game time, the One Hundred and First Regiment band will furnish entertainment. Manager F. F. Mitchell has not decided on his pitcher for the opening battle, but the chances are. he says, that either T. A. McNamara or J. R. Watson will be used. Mitchell is breaking away from the plan of having a certain catcher for each regular pitcher, so that any one of four catchers is available, with the old reliables, Harry Gowdy and G. M. O'Neil, foremost. J. J. McInnis at first base, A. J. Conlon at second, W. L. Kopf or H. H. Ford, probably the former, at shortstop, and N. D. Boeckei at third base, will comprise tomor-row's local infield, while W. M. Bagwell is listed to play in left field, R. R. Powell in center and Capt. W. H. Southworth in right.

With the exception of James O'Connell in center field, the Giants will present the same lineup with which they finished the 1922 season. There is a strong probability that John Bent-ley will pitch either the first or the second game of the season. In the catching department, A. M. Gaston has tions in the New York lineup are as

The game opened in a thrilling fashion. The Scotsmen had won the toss and, profiting by a light breeze, they set up a fierce onslaught on the Thomas Reece. There was little to with an unconverted try. All this choose between the two men in the while the Irish forwards were securcourse of the game but when the fining the ball regularly from scrumand more than once sent in rasping shots that E. Taylor, the visiting goalunder this pressure and in due course the English forwards began to assert shot, a skilled swimmer, and a chamthemselves. The first goal came after plon golfer. about 25 minutes of play. The ball was lobbed into center from left wing NO MEDAL BUT TEAMS 1494 points separated the score pegs the French side obtained its third win and Robert Kelly, England's elusive phenomenal skill and besides winning in the championship series this season. forthcoming, for five minutes later, rections. Perhaps his greatest feat nations Ireland had obtained seven to the intense joy of the onlookers. was to score three breaks of over 500 victories. It was an encouraging Andrew Cunningham brought the son, center forward, who had so much to do with Westham United's success, scored a goal. This was five minutes

before the interval. One goal behind, the Scotsmen began the second half in real earnest. They bustled the English defense incessantly, and at last a miskick by William Wadsworth presented them with an opportunity too good to miss. In a flash Andrew Willand's five goals in this season's internationals, was on the ball, and a second later the crowd was acclaim ing a brilliant goal. The goalkeeper rushed out in an endeavor to smother the shot, but the ball was directed past him and cannoned off upright into the net. Then began a homeric battle for supremacy. Faster and faster the play waxed, first from one end of the field to the other, until the final shrill of the referee's whistle brought the game to a close without further score. This was the fortyseventh encounter between "hereditary

A Return to Fundamentals Seen in Art by M. Desvallieres

AN EFFORT to express fundamental things is the most significant note in French art, in the opinion of Georges Desvallieres. M. Desvallieres is the French meber of the jury of the twenty-second international exhibition of paintings at the Carnegie Institute. Pittsburgh. He was in Boston Friday and Saturday to visit Mrs. John L. Gardner's collection, and the Boston and Cambridge museums and libraries, accompanied by Homer St. Gaudens, director of Fine Arts at the Carnegie Institute. Fine Arts at the Carnegie Institute. In the course of a talk with a representative of The Christian Science Monitor, M. Desvallieres spoke, in effect, as follows:

Cubism has definitely settled into place as an epoch in the evolution of art, the reaction that was needed to stir up artists who had settled into the complacency of decadent impressionism. Impressionism in its turn was a great awakener, with its restoration of emotion to painting in a period that carried the story-telling picture to a point of photographic literalism. With the emphasis upon otion, however, came neglect of intellectual elements, and this neglect brought about a revival of the fundamental element of significant form. This element is to be seen in its primitive purity in the paintings of the Spanish classic master, El Greco.

When Cubism was at its height, before the World War began, it was lowered in good repute by the excesses of many of its practitioners. They said that since the fundamental element of design is significant form, let us distort the forms and thereby call attention to them. Again, since forms that are so presented as to be emphasized in a design indicate strong intellectual impulses, and cause intellectual reactions in the beholder the painters given to excess in be of service to all the people. Thus Cubism were inclined to present forms arbitrarily made, which had behind pert and peasant alike. E. C. S.

fine record in the war. After the armistice he began to paint new types of subjects, subjects profound in their connotation, though as simple as, for example, a soldier in a trench. Into this new work Morot brought all that was good in Cubism—significant form—and achieved pictures that must be regarded as the most modern expression of all that is permanently great in art.

John Singer Sargent is another example of evolution in the artist cor-responding to evolution in art. After his many years of portrait work, when he achieved a world renown as painter of beautiful women-suave, adroitly executed but mundane pictures-he tossed aside a career of assured ease to undertake the arduous and comparatively ill-paid task of decorating the Boston Public Library. He turned at the same time from shallow subjects to themes that influence mankind most deeply. One of his Cambridge, the left panel represent-ing the soldier in the supreme moment of struggle on the battle field, M. Desvallieres regards as a profound expression of fundamental things. This picture is art in its best sense because it means much to the people, at the same time it means much to the dil-

Miniature Painters value of an art devoted to the faithful interpretation of some definite phase of human life. Sally Cross, also, PHILADELPHIA. April 12 (Special is following in Lucy Stanton's foot-

steps.
Portrait miniatures abound, and one which is finds many familiar names: Bertha finds many familiar names: Bertha Coolidge, May Austin Claus, Helen Winslow Durkee, Ellen W. Ahrens Annie Hurlburt Jackson, Berta Carew, Amargaretta Elizabeth Washington, A. Margaretta Archambault, Emily Drayton Taylor

and a host of others.

The old time value of the miniature photographer, but the spring exhibit the ministure painters appreciate this inroad upon their art by modern photography, and are reaching out toward an artistic analysis of char-

The Acme Coal Mining Company declared a dividend of 20 cents a share, payable June 5 to holders of new stock only, of record May 28.

Postum Cereal Company declared the regular quarterly dividends of 1½ per cent on the common and 2 per cent on the preferred, both payable May 1 to stock of record April 20.

Connecticut Rallway & Lighting Co. declared the regular quarterly dividend of \$1.12½ on both the common and preferred, payable May 15 to stock of record April 80.

The Davol Mills has declared a regular quarterly dividend of 1½ per cent and an extra cash dividend of 10 per cent. The extra cash dividend is made payable on May 1 to holders of record April 12, and is to be provided for by the sale of Liberty bonds acquired during the war. The quarterly dividend is made payable on July 2 to holders of record June 25.

DOLLAR ISSUES IN DEMAND ON LONDON EXCHANGE

LONDON, April 16-Dollar descripwere quiet. The general industrial a downturn.

Kaffirs were checkered on the carry-

over adjustments.

Oils were strong in spots. Royal
Dutch was 34, Shell Transport 4½ and
Mexican Eagle 115-16. Rubber issues
months showed something of a loss. over adjustments.

In the main markets were irregular and leaderless because of the fortnightly settlements.

BOSTON EDISON'S EARNINGS

The Edison Electric Illuminating Company of Boston in the first two months of 1923 earned a gross income of \$3,365,900, compared with \$3,088,918 for 1922. Net profits after taxes for the same period were \$1,367,004, comparing with \$1,389,168 for the first two months of 1922 are bringing out huge shipments.

ASSOCIATE GAS & ELECTRIC The Associated Gas & Electric concern reports for February a net income of \$31,654 compared with \$28,598 in February 1922, and for the year ended Feb. 28 net income of \$341,708, equal to \$11.04 on the preferred stock, compared with \$224,405 or \$7.84 on the preferred stock in 1922.

SELLING SOON CAUSES DECLINE

IN WHEAT TODAY August.

CHICAGO, April 16-The wheat totions were in demand on the stock day opened with July delivery at a exchange here today, with Canadian new high price record for the season, Pacific the feature. Argentine rails but active selling soon brought about

The opening which ranged from 1/2 c 395%, Hudson's Bay 7½.

The gilt-edged list was irregular.
Home rails were firm. French loans hesitated on sluggish Paris markets.

The opening which ranged from ½c to ½c higher, with May \$1.26½ @1.27 and July \$1.24½ @1.24½. was followed by a setback all around to well below Saturday's finish.

Saturday's finish.

After opening unchanged to %c higher, May 81@81%c, corn underwent

Provisions lacked support. WHEAT SEEDING UNDER WAY WINNIPEG, April 16—Wheat seeding is under way in southern Alberta. The acreage will be larger than last year. Farmers hold 100,000,000 bushels of old

CUNARD COMPANY PROFITS SMALLER

LONDON, April 16-The Cunard Company reports that after deprecia-tion and taxes, profits for 1922 were £394,587 (at present exchange abo \$1,840,000), compared with £500,080

Directors recommend a dividend of 7½ per cent, the same as for 1921 and 1920. They add: "The company obtained a fair share of Atlantic passenger traffic, but third-class movement continued limited, owing to United States immigration restriction laws. While the carrying trade generally shows an increase over last year, carrying rates, especially homeward from America, have fallen to low levels owing to increasing competition.

FINANCIAL NOTES The Hamburg-American Line is ex-pected to offer soon a new bond issue on a dollar basis. The British March pig iron production was 634,000 tons, compared with 543,000 tons in February, and the highest since January, 1921.

The first Irlsh Free State budget shows a £20,000,000 deficit. Upkeep of army and rebel damages will necessitate extensive borrowing.

Hungarians are said to be investing their money in wheat obligations and using them as money to deposit in banks, thus avoiding risks of currency fluctuation.

H. B. Byram, president of the St. Paul road, denies any one is negotiating for the purchase of his railway. Rumors that Henry Pord is seeking the property, he said, are unfounded.

UNPRECEDENTED PRODUCTION IN STEEL INDUSTRY

Many Individual Output Records Shattered - Wage Increase May Mean Price Advance

NEW YORK, April 16 (Special Correspondence)-Topping all events in the steel industry during the week past was the advance in wages which brought common labor rates from 36 to 40 cents an hour. Some of the independent steel companies in the Toungstown district first made the advance; then the Steel Corporation took action at the first of the week, and by the end of the week practically every steel maker in the country had

granted the advance. Common labor wages will now be \$4 a day for a 10-hour day, compared with the peak rates of \$5.06 made on Feb. 1, 1920, and with \$2 a day pre-vailing in 1915.

The immediate effect will be the advancing of steel-making costs about \$1.75 a ton, and steel makers claim that selling prices will be raised as steel mills do not feel bound to absorb the advance, especially following two years of depression in the industry.

Labor Shortage Marked

Though wage revision had been rumored for the last few months, it was believed of late that it would not be announced until Judge Gary's return from his foreign cruise, However, the start of an exodus of workers from the steel mills to building construction and other outdoor pur-suits speeded the granting of the inwhich goes into effect to-

Many business authorities take alarm at the steel wage advance. They point out that all other lines of in dustry will demand a revision upward, that prices of all commodities will soar, buyers abstain from the market

and depression set in.

Though the labor shortage is a timeworn topic, it is being recognized more and more each day. One large independent steel maker at Pittsburgh has enough orders on his books to justify operating both day and night. However, it can get enough men to work merely one shift. Moreover, the rolling mills are shut down from Friday until Tuesday, while the rollers turn to such incidental work as straightening, shearing and punching -work that is usually done by separate gangs. This situation is typical. Pig iron salesmen who canvas New England report that the many foundries never lacked labor so keenly as at present, this applying to the skilled workers, such as molders, as well as the less experienced.

Unprecedented Production More March statistics were made public during the week, all showing the unprecedented production. The steel ingot output for the 30 com-panies which report to the American Iron and Steel Institute amounted to

3,402,007 tons, as compared with 2,919,017 tons in February.

Total production is therefore estimated at 3,890,000 tons, compared with approximately 3,840,000 tons in October, 1918, the previous record. March production was at an indicated annual rate of 44,780,000 tons. It will be remembered that in the preceding week it had been announced that pig iron production was the greatest in history.

It was only one-third the gain of the servation that steel buying has slackened somewhat and mills are now trying to get made and delivered the the tin trade. huge backlogs which they have accumulated on their books.

high prices and the muchdeferred deliveries, and because most drastically, the market closing the of the consumers covered heavily at lower price levels when they saw the than the week before, or at 46½ cents drift of the market.

Coke Price Drops Off

The only actual price weakness has been in raw materials. Coke has sold as low as \$6.25 a ton, Connellsville, a decline of 75 cents a ton; iron and steel scrap are 50 cents to \$1 a ton lower. Pig iron is starting to ease nace base, whereas the theoretical market price is \$30 a ton.

box, whereas the previous high price had been \$6. The chief makers of alloy steel in the Cleveland district

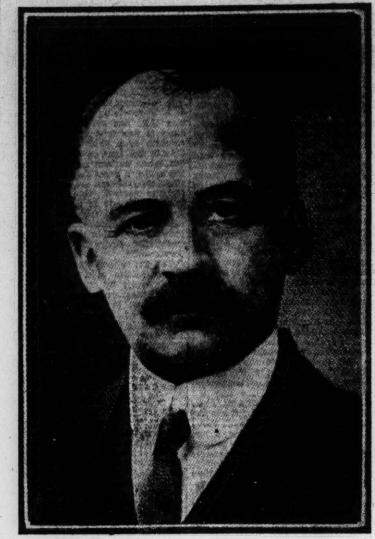

business goes to English makers.

America's usual foreign customers, Japan, China and South America, have been fairly active buyers of jate. A Japanese oil company recently pur-chased 25,000 boxes of tin plate; the South Manchurian Railway bought 8000 tons of American rails. Brazil is taking 160 miles of 50 to 65-pound

Alfred C. Flumerfelt

ALFRED C. FLUMERFELT of Victoria, B. C., one of western Canada's best-known financiers and capitalists, went west as a young man to carve his career. Today he is the head of enterprises varying from shingle manufacture to the handling of Government and municipal bonds, with directorships in the Canadian Bank of Commerce and other

Mr. Flumerfelt is a native of Markham, Ont., and was educated at the public schools there. From 1875 to 1879 he was employed in a wholesale boot and shoe business in Cobourg, Ont. Then he moved as far west as Winnipeg and became associated with Ames Holden & Co. He went to British Columbia in 1886 as branch manager of this important concern and

remained in that position for 14 years. During this period he made his home in Victoria and, becoming interested in mining developments which were then proceeding rapidly in the west, soon found himself a leader in many industrial enterprises. He spared time, however, for active participation in public affairs and was president of the Victoria Board of Trade for 10 years.

He took a keen interest in a number of charities, acting for years as treasurer of the Protestant Orphans' Home. He held a similar office in the Royal Institution for the Advancement of Learning and was treasurer of McGill College. His interest in education caused him to give liberally to the endowment of a chair for civil engineering in connection with the Forestry Commission. He served as quartermaster with the rank of

Mr. Flumerfelt's time now is devoted chiefly to the British-American Bond Corporation, of which he is chairman and which does an extensive bond and financial business in Victoria, Vancouver and other coast cities. He is also president of the Hastings Shingle Manufacturing Company and the International Coal & Coke Company. His interests include the presidency of Weiler Brothers, Ltd., of Victoria, a large furniture manufacturing concern, and of the Commercial & Financial Corporation.

He is a director in the British Columbia Packers' Association, the Miner Rubber Company, the Colwood Land Company, the Trusts & Guarantee Company, Ltd., and the Anglo-Canadian Corporation. He has important interests in eastern Canada also and is a director of Cassidys, Ltd., Montreal. A few years ago he was elected a director of the Canadian Bank of Commerce, one of Canada's largest and most powerful financial institutions. For a short period Mr. Flumerfelt held the portfolio of finance in the British Columbia Government when the Conservative Party

OPTIMISTIC VIEW OF BIG BANKER

Frank A. Vanderlip Says Prosperity Should Continue Despite European Situation

Copyright, 1923, by United Press NEW YORK, April 16-"Have we grown so used to prosperity that people do not recognize it when they see it? One is still asked the question if prosperity is here," says Frank A. Vanderlip, New York financier, in a statement to the United Press Associa-

The 800,000 shares capital stock of \$25 par are carried in the balance sheet at \$10,800,000 as follows: 400,000 shares issued at \$18 a share, fully paid, \$7,200,000; 400,000 shares issued not easy, but that is because there is a not easy, but that is because there is a proper spirit of conservation and the banks are not using the federal reserve system in a way to bring about inflation. There is a sufficient supply of new capital so that enterprise is

"It is true that Europe is making little if any real progress in economic recovery. Nevertheless, our foreign trade is large enough at least so we could not greatly increase it, with our present labor supply and continue to meet domestic demands. I have felt for some time that we could have a large measure of prosperity, in spite

of the bad situation in Europe.
"If we keep our heads, do not curtail productiveness, nor unfairly adtinue the prosperous situation for good while to come."

FIRM FOUNDATION M. Schwab Urges Charles Caution to Prevent

BUSINESS ON A

NEW YORK, April 16-"Indications are that we are entering into a period of business expansion and utmost cau-

of business expansion and utmost caution must be exercised to prevent this from developing into a secondary inflation which would be disastrout." Charles M. Schwab, chairman of the Bethlehem Steel Corporation, declared in a statement today.

"Business is plentiful and industry is active throughout the country," he added, "and we have every reason to feel happy over the situation.

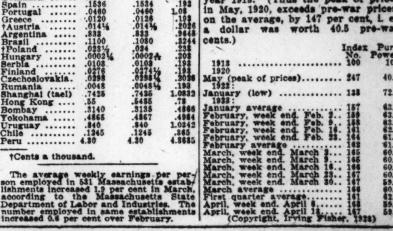

"Our job right now is to keep an even keel and to steer a straight course. Business is on a firm foundation but it must be kept there. Beconomic conditions abroad are not as promising as I would have them but I am not at all discouraged over the outlook and I think progress is being made and will be made for the remainder of the year.

"I have always found the steel industry is a pretty accurate indicator of industrial conditions. Bethlehem plants are working almost to capacity and I am sure the same conditions apply to most other steel mills. It is rather a good sign that a good part of this steel is going into new construction work and railroad equipment. This indicates business leaders are looking forward in an effort to meet demands that will be made upon them for increased production and increased transportation."

SLIGHT HALT IN DECLINE OF BUYING POWER OF DOLLAR

Prof. Irving Fisher of Yale University in his weekly index number service shows the average movement, from week to week (1) of the wholesale prices of 200 representative commodities and (2) of the purchasing power of money.

Both are relative to the pre-war year 1913. (Thus the peak of prices in May, 1920, exceeds pre-war prices, on the average, by 147 per cent, i. e., a dollar was worth 40.5 pre-war

Coupon and registered bonds (interchangeable) in denominations of \$10,000, \$5,000, \$1,000, \$500, \$100 and \$40. Redeemable at par and interest at any time after ten years from date of issue.

The Supreme Court of the United States has held, (a) that these Banks were legally created as part of the banking system of the United States, and (b) that the bonds issued by the Banks are instrumentalities of the United States Government and are exempt from Federal. State, municipal and

Operation: In five years of active operation the 12 Federal Land Banks have been built up until on February 28, 1928, their Capital was \$87,574,477; Reserve, \$8,408,000; Surplus and Undivided Profits, \$2,600,086; and Total Assets \$763,285,082. All twelve Banks are on a dividend paying basis and every bank shows a surplus earned from its operations.

Acceptable by Treasury: These bonds are acceptable by the United States Treasury as security for Government deposits including Postal Savings Funds.

Legal for Trust Funds: The Federal Farm Loan Act provides that the Bonds shall be lawful investments for all fiduciary and trust funds under the jurisdiction of the United States Government. They are eligible under the laws of many of the States for investment of all public and private funds and have been officially held eligible for investment by savings banks in 85 States.

The United States Government, as of February 28, 1928, owned approximately \$8,000,000 of the capital stock of the Federal Land Banks. The Farm Loan Associations, during the year 1922, acquired approximately \$8,500,000 of Federal Land Bank stock, 25% of the proceeds of which was used to retire stock owned by the Government, as required by the Farm Loan Act. The United States Treasury has purchased and now holds over \$100,000,000 Federal Land Bank Bonds. While these Bonds are not Government obligations, and are not guaranteed by the Government, they are the secured obligations of Banks operating under Federal charter with Governmental supervision, on whose boards of direction the Government is represented.

At the request of the Federal Farm Loan Board in co-operation with and on behalf of the Federal Land Banks, we offer these bonds at:

Price 1001/2% and Interest, to yield about 4.45% to the redeemable date (1933) and 41/2% thereafter to redemption or maturity

EDUCATIONAL

Interscholastic Debating Benefits Too Important to Be Lost, Says Coach

Special Correspondence

N THE tenth year of Bates interscholastic debating, with a record as founder of the work later emulated by both Bowdoin and the University of Maine, as a pioneer in the triangular form of debates, as well as in admitting women to the contests, it proves profitable to consider a survey of what has been accomplished, the weaknesses of this preparatory school activity and the prospect for

coach for the two teams which have represented Bates against Oxford Union in the first Anglo-American de-bates ever held, was asked relative to his experiences and conclusions he

'I am convinced," said he, "that interschool debating will be preserved. It must be, in my opinion. For in the last 10 years, in which I have had intimate contact with Maine preparatory schools in these debates, I am satisfied that the problems are being solved as they arise, and in such a way as to encourage those who have sored these debating activities. The benefits are too important to be

The Judging Problem

"The most difficult problem is perhaps that of the judging system. If, schools from all sections. in our league, judges have sometimes served who were prejudiced or too closely related to the speakers, it has angular system was started which has been because those who selected them proved such a success and which has did not understand fully how to make since been adopted by other Maine the selection. Progress was made colleges. We believe this is superior when our league agreed definitely on to the dual system, since each school methods of selecting judges. Each puts out two teams, one taking the school is now put on its honor to ob- affirmative of the question, which is tain the best type; and it is specified debated by all, and the other the that these three critics shall not be, negative. It gives better opportunity either directly or indirectly, connected for practice in rebuttal and for allwith either school or its debaters; also that they shall not be residents of the community in which the debate is held. Their names, before what may be termed the 'easier side' invitations are issued to them, must be approved by the rival school au-

"Although I have referred to this as the most serious problem, I may add that it is little short of a marvel has been supplied by the opponents at that so few complaints have been made regarding judges chosen. Only one case has come to the attention of the debating council since the organization of the league in 1913.

Honesty and Good Sportsmanship "I would like to say that those who have been connected with the evolution of this state-wide debating league the difficulties inevitable in a state as are decidedly optimistic concerning large and as thinly populated as the honesty and good sportsmanship Maine. Distances are farther than in of school principals and teachers. In fact, let me give credit where it is honestly due. For this league would not have been a going concern only judges is difficult.

unsolicited, which stated that as certain rules of the Bates League had the best debating teams have come of thousands of boys and girls through been unwittingly violated by the home from such institutions, although apschool, it was felt that the decision parently severely handicapped.

The best debating teams in the decision of thousands of boys and the "Youth Movement" (Jugend Bewegung) have banded themselves sportsmanship meant that the rival school would become entitled to entering its team for the final contests on the Bates Campus. Such good spirit has been shown repeatedly; and it is this foundation which promises real

stability for the organization. Teams Should Have Coaches

perverted. I will admit that one high their participation in the debates a school admitted to me that 'Our high democratic feature of great value. school coach wrote the speeches. Our business was to deliver them.' But teams need direction. It is really a question of team ethics; and the team all the teams. But there was much ethical ideas of the coach. Usually work done was excellent. But the most successful debaters are those preferred for coaching. But I do not possessing naturally quick minds, condemn the aid of the outside coach. Bates has sent out student helpers where this has been sought, whose naturally logical thinkers. There are where this has been sought, whose work has been advisory rather than dictatorial. The aim is to draw out courage original and genuine debating. It should be impressed upon the students that while victory is desirable, the real motion for the students and to engood debater must be persuasive as well as convincing, a certain emotional quality that appeals to the audiable, the real motive for the contest ence. is the 'game'; and it is a fine thing to dividual—this is not easy, as we have is the 'game'; and it is a fine thing to be a good loser. The debate, we insist, should represent the real work league is good training in many ways of the school and the student should and makes for a thinking citizenship."

The most of the preparation himself. The advantage of the regular teacher as coach lies in his knowing his recruits: and he is always actuated by proper ideals. The temptation to the outside coach, making a comparatively brief visit, is to give 'first aid' treatment, quickly dismissing or revising the

ideas of the debaters and thus produc-ing a debate 'made to order.'

"Our regulations require that 'all contestants are expected to prepare their own speeches with legitimate coaching. Legitimate coaching is interpreted to mean oral advice, suggestion, discussion and criticism

"To meet the criticism that these de-bates might develop insincerity, we have sought to provide that each de-bater shall debate only according to his convictions. However, as a matter of record, few of these immature pupils have such convictions on important may debate on either side. In my 10 To this end, Prof. A. Craig Baird, years' experience with scores of college debaters who have been graduated from these secondary schools we have little cause to believe that the present system will develop sophistry or insincerity.

"The growth of the league has been remarkable. For in 1913, when I had first come to Bates, it was my privilege to organize the first interschol schools and academies competed, all in the neighborhood of this college. "This year over 80 teams from 40 secondary schools from every corner of the State have competed in the preliminaries; and recently 26 teams representing 13 schools were gathered at Bates for the semifinals. "It has been three years since we launched a state-wide league and ac-

cepted into membership qualified Triangular Superior to Dual "It is eight years since the tri-

round preparation. The danger of an ill-balanced question is avoided; and each school has a team upholding as well as one supporting the more difficult. This method gives the debaters more confidence, for the dread has been supplied by the opponents at home. It minimizes the time taken out of regular work, for preparing debates, traveling and undergoing other inconveniences to decide the championship. More students are enabled

Adult Education in Germany

Extent of the Movement

This is the first of two articles on Adult Education in Germany." The second will appear on the Educational Page in an early issue.

By SUSAN M. KINGSBURY Professor of Social Economy, Bryn Mawr College

7HEN I went into Germany last spring I found that everything I had been told about the Ger was wrong. Four months study up and down, across and back that great country convinced me that I, together with most of my fellow citizens, had had no comprehension of what had happened, what is happening, and is sure to happen in Cen-

tral Europe. I found that a revolution had swept that people. Not one but said that it was good for Germany that she had lost the war and cleared the country of militarism. Eight million adults (speaking through their trades union organization) are bitterly determined they have kept faith with each other at every turn.

"Only a few weeks ago a certain school won in a debate. The award was uncontested. But a few days later we received from the principal of the winning school a letter, quite of the winning school and academies, who darkness. Eight minion darkness character and with a companion of debating was not permitted. They have been together with the determination never

Revolution in Education

Workers' Educational Association, the Tutorial Classes, Ruskin England, the People's High Schools in Denmark, the People's Houses in many we have read little, we have known nothing. Yet as part of its revolutionary movement, every type of labor school has grown up in the last five years and hundreds of thousands of workers are attending evening classes, vacation schools, residence colleges, schools conducted by the trade unions, as at Tinz, near Gera in Thuringen; classes conducted co-operation of the trade unions, Socialist Party, and the city, as in Berlin; evening, afternoon and Sunday classes supported entirely by the city where the government is So-cialist as in Leipzig, Cossel, and Dresden; residence schools main-

tion, however, that we are here con-cerned. No adequate report can be given of the extent of this movement or of the attendance in the Volkshochschule because the numbers are changing so very rapidly from session o session and from month to month city of Leipzig, between 3000 and 4000 attended these classes, 70 per cent of whom were workers in industry, 20 per cent workers from shops and stores, and 10 per cent from various employments. Even in the summer 1100 students were enrolled in classes meeting at 5 or 7 p. m.

Workers in Thuringen The State of Thuringen is a most interesting illustration not only of workers' education, but of a fully fledged Socialist government. There every type of school or class for adults and especially for workers in industry, is being conducted. In the city of Jena over 2300 attended the classes last winter, and the number rapidly increased during the winter session. In the summer 1600 to 1700 students attended these evening col-Of this number at least 50 per cent were from workers in industry. But there are 60 towns in the State of Thuringen, in which classes were conducted, with an attendance of over 22,000 students.

Thüringen also maintains at Drei-

sigacker one of the most interesting experiments in residence schools that saw. Everywhere in Germany I had heard of Dr. Weitsch, who is at the head of this school. Thüringen is planning a series of residence schools in preparation for the Betriebsräte. The plan is that the works councils in the various factories shall choose a number of their younger men and the State entiy and intelligently. Imitation and will send these men to school for mimicry with the primary children have failed to develop the capacity to converted into schools. converted into schools.

various tewns of the state. Also the secretary, now Dr. Buckwald, with Everyone knows the interest a child Thuringen, as in Dreisigacker, near the State of Saxony, in which Leipzig Meiningen; and yearly courses of is located, the Volkshochschule are able to make his own music and enjoy fered by the university at the expense supported by a state appropriation and of the State, as at the Univer- by contributions from the trade unions. They are managed by the city board of education.

Labor College at Frankfurt

One other school should be given children and asked them to make a special mention, that is the Labor music story, they complained that they College at the University of Frankfurt. When the Diet of Prussia was being asked for appropriations for the University of Frankfurt, the Socialist block, which is the largest single political group in the Diet, though not in the majority, stood up and said: "We shall vote for this appropriation only mathematics, the foundations of sci- provided the budget carries funds for a workers' college in connection with work and workers in the newer art, the university." Thus in the buildings of Frankfurt University are found the

offices of administration and the class rooms in which are conducted courses for workers in industry. The original play even a more important part in plan was for a two years' course, but not go into learning to play the plano to acquire definite and accurate muthe future of the German state, and up to this time one year only or to sing that goes into learning a sical perceptions. Not otherwise can been possible. Various trade unions throughout Germany send men matics," and "that playing and singing and women, paying them whatever is as professional rather than cultural and women, paying them whatever is necessary for their families.

unions, for the purpose of preparing workers to take part in the management of industry through the works councils. By law passed early in 1920 gig last July during the session of the city of Leipzig last July during the session of the councils. By law passed early in 1920. to that at Frankfurt and that at Tinz, which is more elementary than the chiefly as a recreative and not a prac-Frankfurt Academy. At the rate of tical art, because imitation instead of exchange at that time this sum would have amounted to \$80,000, but really would have accomplished as much as \$300,000 in the United States. What has happened to this plan, with the rapid depreciation of the currency and the great demands which must now be made to support the German people, I do not know, but the spirit is there and I do not believe the plan will be forgotten.

A Daily Affair

One of our ablest educators, Clark W. Hetherington, has said: "The child

learns, develops his powers and be-comes adjusted to adult ways of liv-

ing through his impulses to test and

exercise his latent capacities, to investigate and experiment with his

environment, to emulate and compete and to take delight in achievement,

Any educational process that is not an organization of these impulses is

not natural. In this process the child

will acquire linguistic symbols nat-

urally if they function in his natural

active life. He has no interest in

learning the masses of symbols as symbols, and the length of time it

means of full communication or ex-

pression is too great for the child's

imagination to bridge with a sustaining interest. It is difficult even for the adult. The sense of joyous edu-

cational experience or achievement must be a daily affair. For a daily

natural, normal, educational consump-

tion the symbols must be connected

and achievement. It is his inalien-

able right that he should have this

no value to them.

By OLIVE B. WILSON-DORRETT

AT THE present time the teaching of music in schools and colleges that harmonious adjustment which is essential in the daily round of true. essential in the daily round of duties if we would answer the cry for true leadership and rightly foster the factors that are effective in the formulating of "sound character"—that it should and does demand more educationally of the student and will do more for him than any subject in the curriculum, we have not suction than has ever been given to it since it was first placed in the cur-riculum as a subject of study. Not only is this true of the United States, but other nations as well are giving the matter a great deal of serious con-sideration. There are several reasons the curriculum, we have not succeeded in proving to educators. Why?
We have been teaching music for the sake of the subject rather than for the sake of benefiting mankind. Is for this interest. One is the accepted fact that music is an avenue of expression that is the possession of all nations, regardless of the language of The other may be termed the unsatisfied desire for more satisfactory results.

The latter condition was very apparent in the written statement sent out recently by one of our foremost universities, regarding entrance examinations in music. It is evident that there is not sufficient familiarity with music as a language to warran the type of examination that they deem necessary. They claim that "the time given to music in the elementary and secondary schools might be put in musical fundamentals which pre cede harmony."

Interest by Actual Experience

In the past it seemed impossible to begin the subject at an early age because it was not known how to eliminate effort and establish enthusiasm in the process of learning the symbols of music notation; in consequence, methods were employed that did not give the child the developed ability to express himself freely, independthe point of skill in Learing and using The management in Thuringen is sound in connection with the varied worth consideration. Two professors symbols. We are and have been very from the University of Jena, two eager to awaken a "permanent inter-workers, one teacher from the Volks- est in the subject," but to accomplish hochschule, one engineer and one this a knowledge of it must come through adult leadership with the woman is selected by an assembly of through live actual experience, of a child's natural daily joyous experience the hearers, held every two years in character to arouse deep interest dur-

headquarters at Jena, was chosen at the last assembly. In the city of Leipzig, which is Socialist, as is also or how hard he works to accomplish development and adjustment.' this way? Have we helped the child the process is quite possible; the pro cedure, however, must be easy and from his viewpoint. The first time the writer gave a given quantity of number disks, representing the tonic chord of the scale, to a group of sixth grade children and asked them to make a equipping a child to become a "well disciplined thinker." The value of the easy it was, they were alive with interest. They took possession of the the fact that the work must have its inception during the first years of the blackboard, placed their stories in different keys, erased them and made life of the child, will have to become widely recognized, if we are to reach new ones, singing, transposing, doing everything of their own initiative, and incidentally deriving genuine benefit expression and appreciation. Also, if

GUILD SOCIALISM UNDERGOES TEST

Furniture & Furnishing Guild, Started in Manchester, Eng.,

actual practice in Great Britain within the framework of the competitive capitalist system would be attended by great risk of failure because of finan-

fied.

To the breakdown of the National
Building Guild, recently recorded, has

To the breakdown of the National
Building Guild, recently recorded, has be added the complete collapse of the Furniture & Furnishing Guild, which was started at Manchester just a year ago.

Cause of the Failure

There is common agreement among all concerned as to the cause of the failure. The bankruptcy court of Manchester has ordered the liquidation of the affairs of the Guild Company, and in the course of the proceedings the Official Receiver stated that the guild had been unable to continue solely because of lack of capital. agreed that the enterprise had been carried on in a business-like way apart from the financial side, that good work had been done, and that the books had been well kept.

He expressed the opinion, however

that it was impossible to establish one successfully unless an adequate supply of capital were assured before hand. How far the Furnishing Guild failed to meet this condition may be gathered from the fact that it began with a nominal capital of £100, of which only £16 was actually subscribed. The secretary of the guild stated that an additional £1000 capital would have placed the guild on firm foundation, and the fact that it was impossible to raise this amount from the unions suggests that the guild movement propaganda has made little headway among the rank and file of the workers.

Offer Withdrawn

The offer of Messrs. MacTaggart, the Scottish contractors, to advance £50,-000 on condition that sole powers of management of the affairs of the National Building Guild were vested in them. has now been withdrawn. The creditors are seeking some new means of continuing its operations, and an official of the Co-operative Wholesale Society has been called in for con-

In spite of its setbacks, the guild movement has not capitulated. The Manchester committee of the National Building Guild has decided to try to raise capital to start a local guild with a policy of avoiding commitments bend its financial resources. Unless £5000 is actually subscribed, this

project will not be proceeded with.

The one guild which appears to be justifying itself is the Agricultural Guild, which is operating in connection with the new Welwyn Garden
City. This body is maintaining a much higher standard of wages than 24 words, \$17. list 19 free; sales letters written. farmers are paying, and confidence in the future is suggested by the decision a day or two ago to extend the enter prise by adding an up-to-date poultry

ART NEWS AND COMMENT

Modern Russian Paintings in San Francisco Show

painter developed in Russia during the latter part of the nineteenth century. These are Sergei Scherbakov and Nikolai Nedashkovsky, who command the opening rooms with their water color and oil paintings. Their work is markedly removed from the staid and romantic canvases of the older artist, Ivan Kalmykoff, whose work covers the other five rooms devoted to this display.

This is the first American exhibition in San Francisco to join the numerous colony of Russian refugees who have Ivan Kalmykoff is a Cossack, a wanderer who loves the local color and feel of foreign lands. Since he left Moscow at the outbreak of the war he has painted and exhibited in Peking, Shanghai, Hong Kong, Tientsin, Ja-pan, Sumatra, Celebes, and Burma. He gave his first Moscow exhibition in 1888, later he exhibited in Vienna, Berlin, Karlsruhe, Paris, and Rome.

Ivan Kalmykoff

In the present exhibition Kalmykoff shows many small sketches as well. Each sketch is carried to its proper atmospheric completion, to express the local color and the illustrative fact. His larger canvases are more ambiguity and the same themes; in the architecture and nature native to will achieve their value in the American shows an understanding that is yet formative but progressive and typical of his generation. It is not too assumtions renderings of the same themes; ing to hope that these younger men will achieve their value in the American tious renderings of the same themes; ing to hope that these younger menthe architecture and nature, native to each country. His enthusiasm for places is unbounded. He has a strong sense of tone that expresses season. He is master of tropical moon light and relative modern by the strong sense of the same themes; ing to hope that these younger menting to hope that the younger menting to hope that the younger menting to hope that the younger menting to hope that they younger menting to hope they younger menting to hope that they younger menting to hope season. He is master of tropical moon-light and weird lights on heated shore waters. Odd buildings and quaint countrysides that depict the romance of a country are all brought to our delighted gaze in these canvases.

In many of his subjects the decora-tive sense is subordinate to the subject matter. This is overcome in the noonlight subjects such as "The Taj Mahal" which he treats with none of the overelaborate sentiment, one might fancy. Instead he shows this beautiful subject with such a simple glow of controlled tone that it remains in memory as one of the real

serious efforts of the exhibition. In many of his paintings are figures well placed in design and so authentic in costume as to appear of real value as historical record. His larger por-traits are not his best forte although they are interesting from the racial study they afford.

While these paintings by Kalmykoff are not entirely typical of the most recent Russian tendencies, they are pleasantly acceptable as a product of an artistic vision free from any limitations. An artist from another country might have almost the same rese were he to visit the same places, and he might perhaps record his appreciation in much the same manner should he belong to the same school of romanticism and realism.

Scherbakov and Nedashkovsky

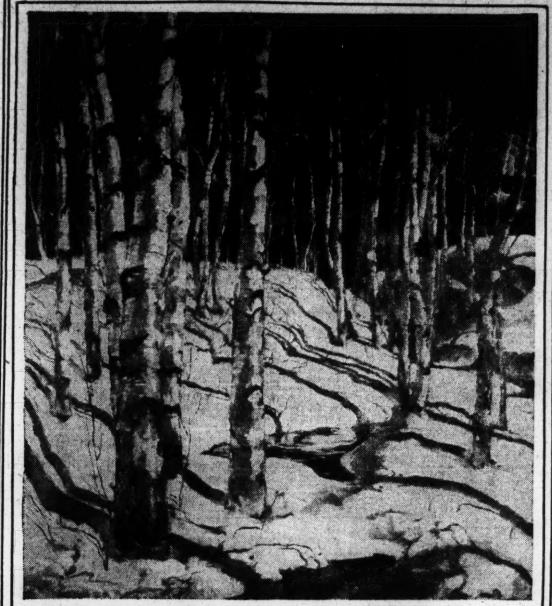

While the work of Kalmykoff is enreadily translated to the picture lover the other two exhibitors present styles that contrast drastically and are scarcely to be understood at first. They offer a fresh version of nature which bespeaks a newer vision as well. They are exponents of the mod-ern use of peculiar tonal effect combined with accented form in design They strike a new note in Russian expression in painting that interests the art lovers in the United States from many viewpoints other than the

Both Scherbakov and Nedashkovsky were born in Russia in 1894; both be-long to the Russian Art Society, "Boodiak" (Thistle), Nedashkovsky being one of its founders. They have spent the last four years in Japan, where their works were bought by the private gallery of Prince Utanisan and a number of Scherbakov's pictures

San Francisco, April 4 | were purchased by the Japanese Im-Special Correspondence perial Family. Indeed, Scherbakov's N EXHIBITION of paintings, by Aquarelles are in so many instances A contemporary Russian artists has stirred much ambition and comment among the Pacific Coast artists and has sounded anew the ever international note in art since the moment of its opening in the San Francisco Palace of Fine Arts. The major theme is carried by Ivan Kalmykoff, a painter developed in Russia during the men represent the younger generation bearing tidings of their ancient kin-Another strain is introduced in the ship with the early Byzantine tradi-very different work of the other two Russian art and decoration.
Sergei Scherbakov contributes a room of water colors, small pictures, tenderly detailed and laborious in

organization. They are all of out-door motive and all handled in a manner at first incomprehensible. He has devised a peculiar formula for rendering nature in calligraphic design. The atmospheric chimera of the futurist is lacking, yet the structure and overby Kalmykoff who has recently arrived laying masses are so carefully worked over that there seems to be an uncolony of Russian refugees who have chosen this spot to pursue their work. they mingle in color, that is not unlike the futurist principle. His trees, rocks, clouds, waves and shore lines are all resolved into intricate design and brilliant color, that almost moves

Another adventurer in the realm chromatic landscape is Nikolai Nedashkovsky. His medium is oil and his canvases relate to the new school, wherein the actual landscape is expressed in pure color and significant form that tell of its eternel verities

Mountains and impart to my work a suggestion of worth investigating. Mountains and rocky shores by the sea, snowy hills and the wide stretching countryside, is beyond." these themes come naturally to a Norwegian, as Mr. Lie is by birth, although he came to the United States as a youth and took up his studies at the art schools in New York City. The surging life of the new world gave him a proper stimulus and has mpelled a long series of canvases during the past 20 years which have marked him with increasing surety as one of the leading American landscapists of today.

Mr. Lie made a 10-strike when he painted the Panama Canal series, also a bit of artistic history. It required a big man to record the manifold aspects of that mighty undertaking, and in no way did he slight the task. Although there are no canvases of that epoch in the present exhibition, Mr. Lie's decorative powers find ample scope in the winter scenes and contrasting summer idylls that have oc-cupied him of late. While he is naturalistic and faithful to a degree in recording the various effects of light and shade and natural beauty,

searches deeper to uncover the latent but the lyric key and spirit of the PAINTINGS by Jonas Lie, current of the wind snapping the snow-the fact that the world about us is far finer than we have averagely any conception of, that there are just as many new aspects of beauty to be revealed as they are minds to search. There is a world of splendid forms and color harmonies vigorously and hills. As he himself puts it, "I do not

His "Frosty Morning" is brilliant ciation of Montreal have been purwith the glittering sunlight on snow chased by the trustees of the National and birches, as is also that most decorative canvas entitled "Maidens of the Forest," birches again at close range casting their shadows over the snow in intricate patterning. Mr. Lie goes out for these winter scenes in true Scandinavian style, skiing to the point of vantage and setting up his easel in the oft-times deep snow. But these vigorous methods bring vigorous results, and there is always an atmosphere of authenticity in his work that is most refreshing. The color is bold and strong, but never forced out of the bounds of possibility; the distant hills are often of a blue or purple tone that

Will You Help?

We ask the co-operation of all telephone users in Metropolitan Boston in putting into effect today (Monday, April 16), the use of the prefixed zeros, as shown in listings in the Boston telephone directory.

It will be extremely helpful to operators if patrons passing calls for numbers will give them exactly as they are printed in the directory. For example, a call for Malden 0068-W should be spoken as "Malden Oh, Oh, six, eight-W" and not as "Malden 68-W."

Co-operation in this respect will enable us to handle calls more quickly and more accurately. We ask it, therefore, in the interest of good service

Our reasons for this request are:

In a few weeks the Aspinwall machine switching central

office will be opened in Brookline. The machine switching apparatus is so designed that it will operate properly only with a four-digit number.

It will be necessary, therefore, for all operators calling in to Aspinwall to call four digits and for all Aspinwall subscribers then to use four figures in dialing calls to any telephone listed in the Boston telephone book.

The use of the prefixed zeros is established at this time in all central offices in this area in order that the method of calling may be uniform and as one of the necessary steps in the gradual extension of machine switching operating to other exchanges.

Analyzing Nonsensicalness

since discovered that they do not know the chart which the Bellman pro-"Mother Goose." I cannot feel as sad vided: as some of my friends, because books so good are certain to have recurrent He had bought a large map represent-"revivals," and it would surprise no one if, the year after next or ten years hence, everybody were quoting them they found it to be as once they did. There is nothing new to say about the Alice books; but I have often wondered why so few people know Lewis Carroll's other books, "The Hunting of the Snark," and "Sylvie and Bruno."

I have a copy of the former, published just twenty years ago, with pictures by Peter Newell, and containing, besides the "Snark," all the poems from "Rhyme and Reason," from the Alice books, and from "Sylvie and Bruno." The Preface to the "Hunting of the Snark" is an amusing parody of the old-fashioned preface. "If—and the thing is wildly possible," he begins, "the writing of nonsense were ever brought against the author of this brief but instructive poem, it would be based, I feel convinced, on the line:

'Then the bowsprit got mixed with the rudder sometimes.'

it unsettled which you will say first.
Now open your mouth and speak. If
your thoughts incline ever so little best nonsense poem ever written, betoward 'fuming,' you will say 'fum-ing-furious'; but if they turn, by even style. We remember lines of it long a hair's breadth, toward 'furious,' you after gems of wisdom have faded; for will say 'furious-fuming'; but if you example: have that rarest of gifts, a perfectly balanced mind, you will say 'frum-ious.' One may suppose, then, that "snark" is the result of trying to say "shark" and "snail" at the same time; though this is a dubious etymology, and the derivation of "boojum," the creature into which the snark turned, eludes one altogether, as it did the captain and his crew.

It is a good joke that the poem, although Carroll insisted that it meant absolutely nothing, has had many interpreters. Some have thought it a travesty on a celebrated lawsuit; others have held that the Snark is Popularity; and one lady wrote a very ingenious essay to prove that the poem pictures the search for happiness, like Maeterlinck's "The Blue Bird," or Johnson's "Rasselas." Even though the author was greatly amused over these efforts, we may still enjoy applying each of the theories of interpreta

PRESIDENT HARDING is quite right in his determination to maintain his stand on the World Court, despite

The President vs. The Politicians

the clamor of irreconcilable politicians. In the end the sound common sense of the Nation will approve his position with votes, even as it does now in its wide-spread expression of favorable opinion. But for the moment, the peculiar genius of the politicians for obscuring with a mist of false pretense and entangling in a mesh of personal jealousies

an issue on which public opinion is virtually united must have its play. It is unfortunate that former President Wilson should have added fuel to the flames of this political controversy by the letter to Representative Rouse protesting against any conditional acceptance of the World Court, and demanding that the United States take membership in it only in accord with the provisions of the League of Nations without reservations. Tenacity of personal opinion is not an unmixed virtue in a public man, however contemptible may be the nature of one who shifts his apparent convictions with every change in the temper of the public. Compromise is apt to be essential to democratic government, and insistence on an ideal, however admirable in the abstract, is a positive injury to the state if it prevents the attainment of a present, practicable good.

Even the most loyal supporters of President Wilson, who ascribe to him the primary credit for the establishment of the League of Nations in its present form, admit, though reluctantly, that a certain lack of tact, an unwillingness to share credit, and a stubborn insistence upon individual convictions were responsible for the refusal of the United States to join it. His failure to invite a single representative Republican to be one of the United States delegation to Versailles inevitably and irrevocably put the stamp of a party measure upon the Versailles Covenant. Refusal to accept reservations at a moment when compromise was still possible finally put the United States definitely out of the League. It is a question over which future historians will long debate as to whether Woodrow Wilson was the more efficient as the protagonist or the antagonist of the League of Nations. But neither future historian nor present-day journalist will question that the reviving sentiment for entrance upon the League has suffered a check from the former President's proclamation.

Just as in 1919 the refusal of the then President to acquiesce in reservations resulted in the complete defeat of the Treaty, so today a like uncompromising attitude toward the World Court puts that issue in jeopardy. Mr. Wilson will perhaps not estimate accurately the measure of aid and comfort he has given to the very irreconcilables who scrapped his treaty. But his letter was scarcely published before Republicans of the sort of Lodge, Watson, and McCormick were using it as an argument in support of their contention that the Nation could not join in the World Court at all without becoming a full member of the League of Nations. And so, some because they really disapprove of and honestly dread the League, and other's because they apprehend that any step toward a fuller participation in international agreements will strengthen Mr. Wilson's party, an active campaign against the World Court has been begun in Republican

It is declared by President Harding's friends that he purposes standing to his guns. He believes that on this issue he can go to the country with confidence. In this position he merits and will receive public approval. Disregard of the clamor of timid or prejudiced politicians and sturdy adherence to his proper belief that the World Court offers at least one step toward the assurance of permanent peace will unquestionably strengthen the President before the Nation.

No one conversant with the history of Japan during the past two decades, and with the habit of thought

Japan and the Five-Power Pact thereby inculcated among its leaders, markedly, and, to somewhat less degree, among its people, too, was surprised at the reaction throughout the Mikado's islands to the discussion in Washington and London in the matter of altered naval gun ranges. Nothing less was to have been expected of the militarists than that they would

seize the chance again to shout that no advertised disarmament was aught but a blind, and that the one safe path to peace was through slavish obedience to the lying old Latin tag about being prepared for war.

Let no alarmist feeling arise because of all this. Just as now we know that the gun range fracas was misunderstanding where it was not actual misstatement, so the Nipponese echo of it is no more than the inescapable outcry of a vociferous minority. It will lead to nothing. The Ministry now in control has given indisputable proof of its honest intent to live up to the pledges which Tokyo made at the American capital. All vessels to be scrapped under the terms of the Five-Power Pact already have been transferred to the reserve list and are in process of disarmament. The naval establishment at Port Arthur has been abolished, the personnel of the fleet reduced by 12,000 officers and men, and the number of employees in the arsenals by 6000. Although a reduction of land armament was not included in the Washington understandings, Japan has cut her army by five divisions. The budget for 1923, approved only the other day, demonstrates that the movement is to go yet further, for the aggregate of the army appropriation (\$102,000,000) with that for the navy (\$138,000,000) shows a cut of close to \$25,000,000 under the similar figures for the

twelvemonth just closed. The Premier has declared: "Our leading men, whatever may be their political views, are agreed upon the fundamental principle of a foreign policy of accord and co-operation"—and it is a splendid start that has been made along this road."

This joint curtailing of maritime forces is one of the biggest things put through since the historic eleventh of November, five years ago. Its fulfillment will bring untold relief to millions. But let it not be forgotten that its ultimate success depends, after all, less upon sealing wax and signatures than on good faith. With that for motive power, and good will as lubricant, the war-weary world will save a deal of money and materially lessen militarism. It is not only that which is nominated in the bond which counts: there is the little matter of what both mere common sense and true self-interest can (and should) read between the black and white lines. The spirit of the Five-Power Pact is as unmistakably clear as its admirable letter. The people of five nations wish it observed in essence as well as phrase.

DURING the World War, if there was one fact concerning which the average citizen of the United States

Admiral
Sims Denies
Atrocities

felt perfectly sure, it was that German submarine commanders in more than one instance fired upon open boats containing the survivors of vessels which had been torpedoed. Rear Admiral Sims, in a statement made to the press corroborating the speech he made recently in Los Angeles, has stated that, with the exception of the case of the

Llandovery Castle, there has been no official record of any such brutality by German commanders. He went on to say that, on the contrary, they as a rule were chivalrous in their treatment of those whom their duty forced them to expose to the rigors of the open sea. These are such startling statements, from the standpoint of common belief, as to be almost incredible to the average reader, but Admiral Sims ought to know, if anybody does.

One of the crying needs of the world today is for justice, and an unprejudiced appraisal of events and situations. Only those who are devoid of any feeling of normal regard for their fellow man have a desire deliberately to do another an injustice. And no fair-minded persons want to do the Germans or any other people an injustice. It is certain, however, that the public in the United States was given to understand that a very different state of affairs existed from that which Admiral Sims indicated the other day. If his assertions are true, the facts should be given as wide publicity as the previous reports have been accorded.

Admiral Sims goes even further than a merely negative statement of the case, however, by declaring that when the submarines sent a torpedo into an allied vessel, "the German commander would radio the news to us and tell us to go out and pick up the survivors." It seems incomprehensible that the Admiral would make such assertions unless he could back them up, though it is hard to understand why, if the condition of affairs is as he states, he has not made public his disclosures before.

It is to be expected that from the British Admiralty and the French Ministry of Marine there may come statements taking sharp issue with the Admiral. In fact, in a dispatch to The Christian Science Monitor, published last Saturday, the Admiralty claims that while the case of the Llandovery Castle is the best authenticated instance of the firing upon boats containing fugitives, "it is by no means the only example of instances of the kind referred to." In the interests of history, no less than for the protection of the good name which governments must hold, if they are to retain the respect of their peoples, this issue should be pressed to a final determination. It would be a shocking and a scandalous thing to learn today that the naval authorities of France, Great Britain, and the United States had systematically put out false reports of German naval atrocities in order to keep public indignation at fever heat. The Navy Department asserts that as Admiral Sims is no longer in active service, it is not responsible for his utterances. That may well be, but it is responsible for its own standing in the eyes of the people, and if this standing is to be maintained above suspicion and doubt, it should take immediate steps to controvert the Admiral's assertions, or else to admit a past fault and purge itself of the sin of falsehood.

The wounds of the war must be healed. It is not necessary today to come under the stigma of the charge of pro-Germanism to assume a judicial attitude toward some of the stories which during the war were accepted without question, when doubt is cast upon their truth. Certain it is that if these stories are not true, the holding to them in consciousness will not heal the situation.

No DOUBT it will be charged by those who would disparage Governor Pinchot's efforts to enforce prohibition

Righteous

Law En-

torcement

in the State of Pennsylvania that he is whistling to keep his courage up. In an interview appearing in a recent issue of the Manufacturers Record, published in Baltimore, the Governor sends an encouraging word to those people in every state who are seeking some means of overcoming the menacing tendency toward lawlessness.

Beginning with the reassurance that it is his purpose and within his power to bring about complete enforcement of the Eighteenth Amendment in his own Commonwealth, he answers those who are insisting that it has been proved that it is impossible to compel respect for the law by stating that, as a matter of fact, "the United States is not only dry, but getting steadily dryer."

There is no doubt whatever, and it is well for all fair-minded persons to appreciate the fact, that it has

been a part of the propaganda of the foes of enforcement to make it appear that nothing is easier than to violate the law. The same might be said, and with equal force, of any law which society has enacted since the day Moses gave the Decalogue to the Children of Israel. The law forbidding the bearing of false witness, the prohibition against stealing and against all the crimes which civilization has been taught to shun, can be broken with equal ease. No human power can prevent such transgressions of the law as human depravity may incite or inspire.

But there are effective continuing processes by which observance of the law is encouraged or finally compelled. Governor Pinchot does not hesitate to say that these processes are now active, and that the realization is being impressed that the law, written into and made a part of the Constitution, is the approved policy of the people, the source of all governmental authority. He answers those who are seeking to make it appear that the amendment attempts to prescribe a method of government adopted without the consent of the governed by declaring: "Slavery itself was not more thoroughly discussed in advance of a decision than this very matter of prohibition, and no decision ever taken by our people was ever more deliberately registered, or more clearly in accordance with popular will."

It is high time that the American people aroused themselves from the false belief in the power of the indulgent, the morally lax, and the vicious, to override and annul their solemn pronouncements. The theory of government has not been changed. The issue now is not whether prohibition shall be adopted as a national policy. It is whether or not the law as it is written, with the approval of the people, shall be upheld and respected.

THAT New York can now boast 700 art exhibitions in the season, instead of the 125 of ten years ago, has

been declared by an optimistic art dealer to be a mark of unusual progress and interest. He forgets that numbers count for nothing at all in art. Today can claim thousands of artists in place of the mere hundreds—if that many—in Italy or Spain, France or England, Holland or Flanders, during the supreme periods of art, but who would

A Mistaken Trust in Numbers

consider modern artists more accomplished for that reason? It is the artist's work that counts, and so it is the quality of the exhibition alone that matters.

Nobody, not even the hardened art critic, could visit 700 exhibitions with any profit in so short a time. It is both physically and mentally impossible. More is to be got out of the study of one good painting or statue, print or drawing than from a rapid glance at endless collections of mediocre work. The tendency is to overdo the exhibition business. One show, often two or three arranged together, succeed each other month after month in the Bond Street galleries of London. New York is more enterprising, however, so that a fortnight seems long enough for the dealer's usual show to remain open.

Ten good exhibitions in the course of a winter would be sufficient for the reasonable man to digest with comfort and pleasure to himself. And London and New York, as well as Paris, can easily, and do as a rule, supply that many. To counteract this incessant harping upon numbers as a proof of progress, the importance, the necessity of quality in art cannot be preached too often or

too strenuously. A smattering of art is of no use to anybody, and it is impossible for 700 shows in a season to give more than a smattering, or for the museum or the school all the year round, unless it is properly equipped. The superstition still lingers among the thoughtless that art is a plaything, a pastime for the wealthy and the idle. But the manufacturer, the business man, knows better, even though he may brag that ours is a business age. He knows that he needs the artist, that in most things he manufactures he cannot do without the artist, and in America he knows, too, that often he has to rely upon the artist of other countries, which does not make for economy. And it is through the right sort of exhibitions, museums, and schools that a knowledge of art is spread among the people from whom the artist springs.

Editorial Notes

WHEN the American boy again steps into the limelight in New York on May 1, as he marches 100,000 strong up the length of Fifth Avenue in celebration of that city's Boys' Week, he will present a picture of Young America which should be an inspiration to all with the aspirations of the United States at heart. It may be remembered that last year this "week" filled the city with triumphant boyhood in a series of marches, athletic meets and other festivities, and there is every reason to expect that this year there will be fully as many events. The effort of those behind the Boys' Week movement is to give the boy a better understanding of his importance in the community and the responsibility which is his toward that community, to show him that he has no egotistical importance but a patriotic one. An estimable ideal, and one which deserves support. + + +

Even though Mme. Alfred Mortier, the French author who has written under the pseudonym of "Aurel," should not be accepted among the forty "immortals" comprising the Académie Française, the fact that she is being given official consideration as a candidate for a seat therein constitutes of itself an honor of which she is entitled to feel proud. For this is the first time since the Academy was founded in 1634 that a woman has received such recognition. The leaven is seen to be working on every hand.

A New Pompeii Reconstruction

NAPLES, Italy, March 25 (Special Correspondence)—
There is expectation that the newly-excavated portions of Pompeii will soon be thrown open to the public, and the occasion is being eagerly awaited, for it is very well known that something of a sensational character will be presented and that incidentally the old Pompeii which we have known and marveled at all these years, will be overthrown. That is to say, as this new Pompeii is presented to view it will be found that a wrong impression was previously conveyed because the earlier excavation work was thoughtlessly or carelessly performed.

The old Pompeii, which travelers have been looking upon for so long, and the new Pompeii, which as yet is kept secret from them, are quite different from each other, and the former, in a certain sense, will become obsolete when the new one is exhibited. It had been hoped that the new excavations, upon which there has been work done for twelve or fourteen years, would have been presented to the public last summer, but there have been necessary delays. Meanwhile, however, there is no doubt about the nature of the work or the discoveries that have here been made, for many independent observers have already inspected the excavations.

The general idea of the casual and hurrying traveler that what they have seen of Pompeii is Pompeii complete, the whole city just as it was when Vesuvius poured her lava upon it and extinguished it, is, of course, altogether wrong. Even now, with all that has been done in the last ten years, about a third of the old city still remains to be uncovered and pieced together again, so far as this can be done, and there is the best reason to believe that the part that is now coming to be exposed will be one of the most interesting and instructive of all, representing the richest quarter of the old city.

It may take anywhere from fifty to a hundred years to complete the work of excavating on the present lines. Moreover, it is a highly expensive work, and the Italian Government, which is prosecuting it with persistence and thoroughness, is affording new knowledge and delight to the world, for which all should be grateful. The controlling head of it is Signor Spinazzola, an archæologist, who combines the qualities of great knowledge, keen imagination, a cunning ingenuity and a quite tireless patience, each of which qualities is essential to the task in hand.

He has under him a small staff of inspectors, of corresponding capacity, and experts all. Another quality, quite paramount, must be possessed by the workmen, and by all others, back to the chief at the top again, and that is the quality of being absolutely conscientious, for the cardinal feature of the new Pompeii is that it is all reconstruction work, and if this were loosely performed, on the one hand, or if, on the other, the imagination and ingenuity were given too much freedom and permitted to embark on lively adventures, it were better that the new Pompeii had never been brought out, for the truth would not be spoken. As it is, we may be sure it is spoken, and that it is the old Pompeii that is in a measure falsely presented.

The difference has been established in a curious and interesting way. People who have made a little study of the Pompeii we have had all these years, and have not merely walked down the streets hurriedly on a wet day and turned into the atrium of the house of some noble old Roman of the past to take a glance at the frescoes, have had it impressed upon them that this Pompeii, rather strangely all things considered, was a very gloomy sort of city in its outward looks, and most particularly that it did not correspond to the suggestions made in all those frescoes, which were alight with the joy and color and gayety of life, as one would expect them to be, the true circumstances of Pompeii being considered. But the Pompeii that was produced by the old excavators was a dull, sad place to wander in, chiefly because the backs of all the houses were turned to the streets and the fronts faced the other way.

The fact is that the old excavators did their work badly; they hardly did it better than simple quarrymen, told to be careful, might do it. They brought little knowledge and no imagination to bear upon it, and when a conclusion was only half suggested they seem to have adopted it forthwith. Thus they made serious mistakes, and thus they turned the backs of the houses to the streets, as they should not have done. When, digging and excavating, they came to something firm and fast, they scraped around it, freed it and set it forth. All the loose stuff that was about it, bits and trifles, and all the lava that bore molds of everything, they cast aside as rubbish. But those bits and trifles, had they been pieced together and pondered upon until their use was known, would have been found to complete a story of construction that was only half-known, or even completely to direct an idea along another direction.

This is the secret of Signor Spinazzola's great success, for it is very great. He was set thinking in the first place upon the differences between those frescoes and the appearance of the Pompeii that had been reproduced by the old excavators, and he felt there must be something wrong. So there in the new excavating work that was being done he took the minutest care. Nothing but dust was neglected, and even dust was looked at twice. Every morsel of solid material was picked up and examined, and nothing was abandoned until reluctantly it was felt it could have no part in the great work of reconstruction that was being conducted. For the rest, every bit, every item, was noted, examined, recorded as to its place and circumstance, and numbered, so that when the grand puzzle was being solved it could be set in its place to help make the completed whole. In this way some of these bits that the old excavators would have thrown away have been found to be veritable keys of the reconstruction.

Tiled roofs which lay in thousands of fragments have thus been pieced together, and all the signs being by imagination understood, have been put back on to the houses to which they belonged. Windows and balconies and the remains of delightful loggias, the like of which was all overlooked by the old excavators or cast thoughtlessly away, have been discovered and put in their proper places, and it is these specially that show that the houses faced the streets and that the streets were bright. Another instance of Signor Spinazzola's ingenuity is the use to which he has put the molds made in the lava when it ran over the doomed city. It made a mold of everything, and the molds remain when the things they represented have perished. From these molds Signor Spinazzola has made the things anew and has fitted them into their proper places. Thus it is, for example, with doors. He is providing houses with exact copies of the original doors. The ultimate result will be such a splendid work of reconstruction as has never been accomplished before, and all who in the past have been interested in a visit to Pompeii, so easily reached from Naples, will need to make another visit to complete their satisfaction and correct their ideas.
